- **Skill Development**

Our SaaS cloud LMS is a feature-rich software perfectly developed to solve any learning needs, from elementary schools to enterprise companies. Paradiso Learning Management System can easily be customized by adding or removing features that would let you build the best eLearning experience for your users. That's why Paradiso LMS is recognized for its flexibility to adapt and satisfy multiple use case scenarios.

Paradiso LMS flaunts a clean and easy to use interface while rolling out a fully integrated e-learning portal that is power packed with features like social learning, gamification, multi-tenancy, blended learning, advanced and personalized reports, and much more.

You can create, edit and delete as many users and courses you want. All your eLearning requirements can be done or developed by Paradiso Solutions. Also, if you don't have your eLearning courses, we can design and customized the content with the interactivity that you need.

Even better, it could be integrated with 100+ third-party platforms, while providing robust data security. On the other hand, with our plug and play functionality, the LMS implementation happens in minutes.

Paradiso is now used by thousands of users in more than 22 countries.

Our Company

Paradiso Solutions is an eLearning and technology company with the DNA of Silicon Valley. We provide end-to-end solutions to different industries including retail, manufacturing, Healthcare, education, corporate training, and more. Some of the products and services we offer are: LMS or eLearning platform, Authoring tool, off-the-shelf courses, course creation services or custom content development and managed learning services. Paradiso LMS has been consistently ranked among the top cloud LMS in the market.

We have a powerful team of experts in Learning, Training Management Systems, and Content Creation, located in 5 different offices around the world; United Kingdom, United States, India, Mexico, and Colombia.

Since 2007, we have helped companies and institutions to drive growth, user performance, and revenue.
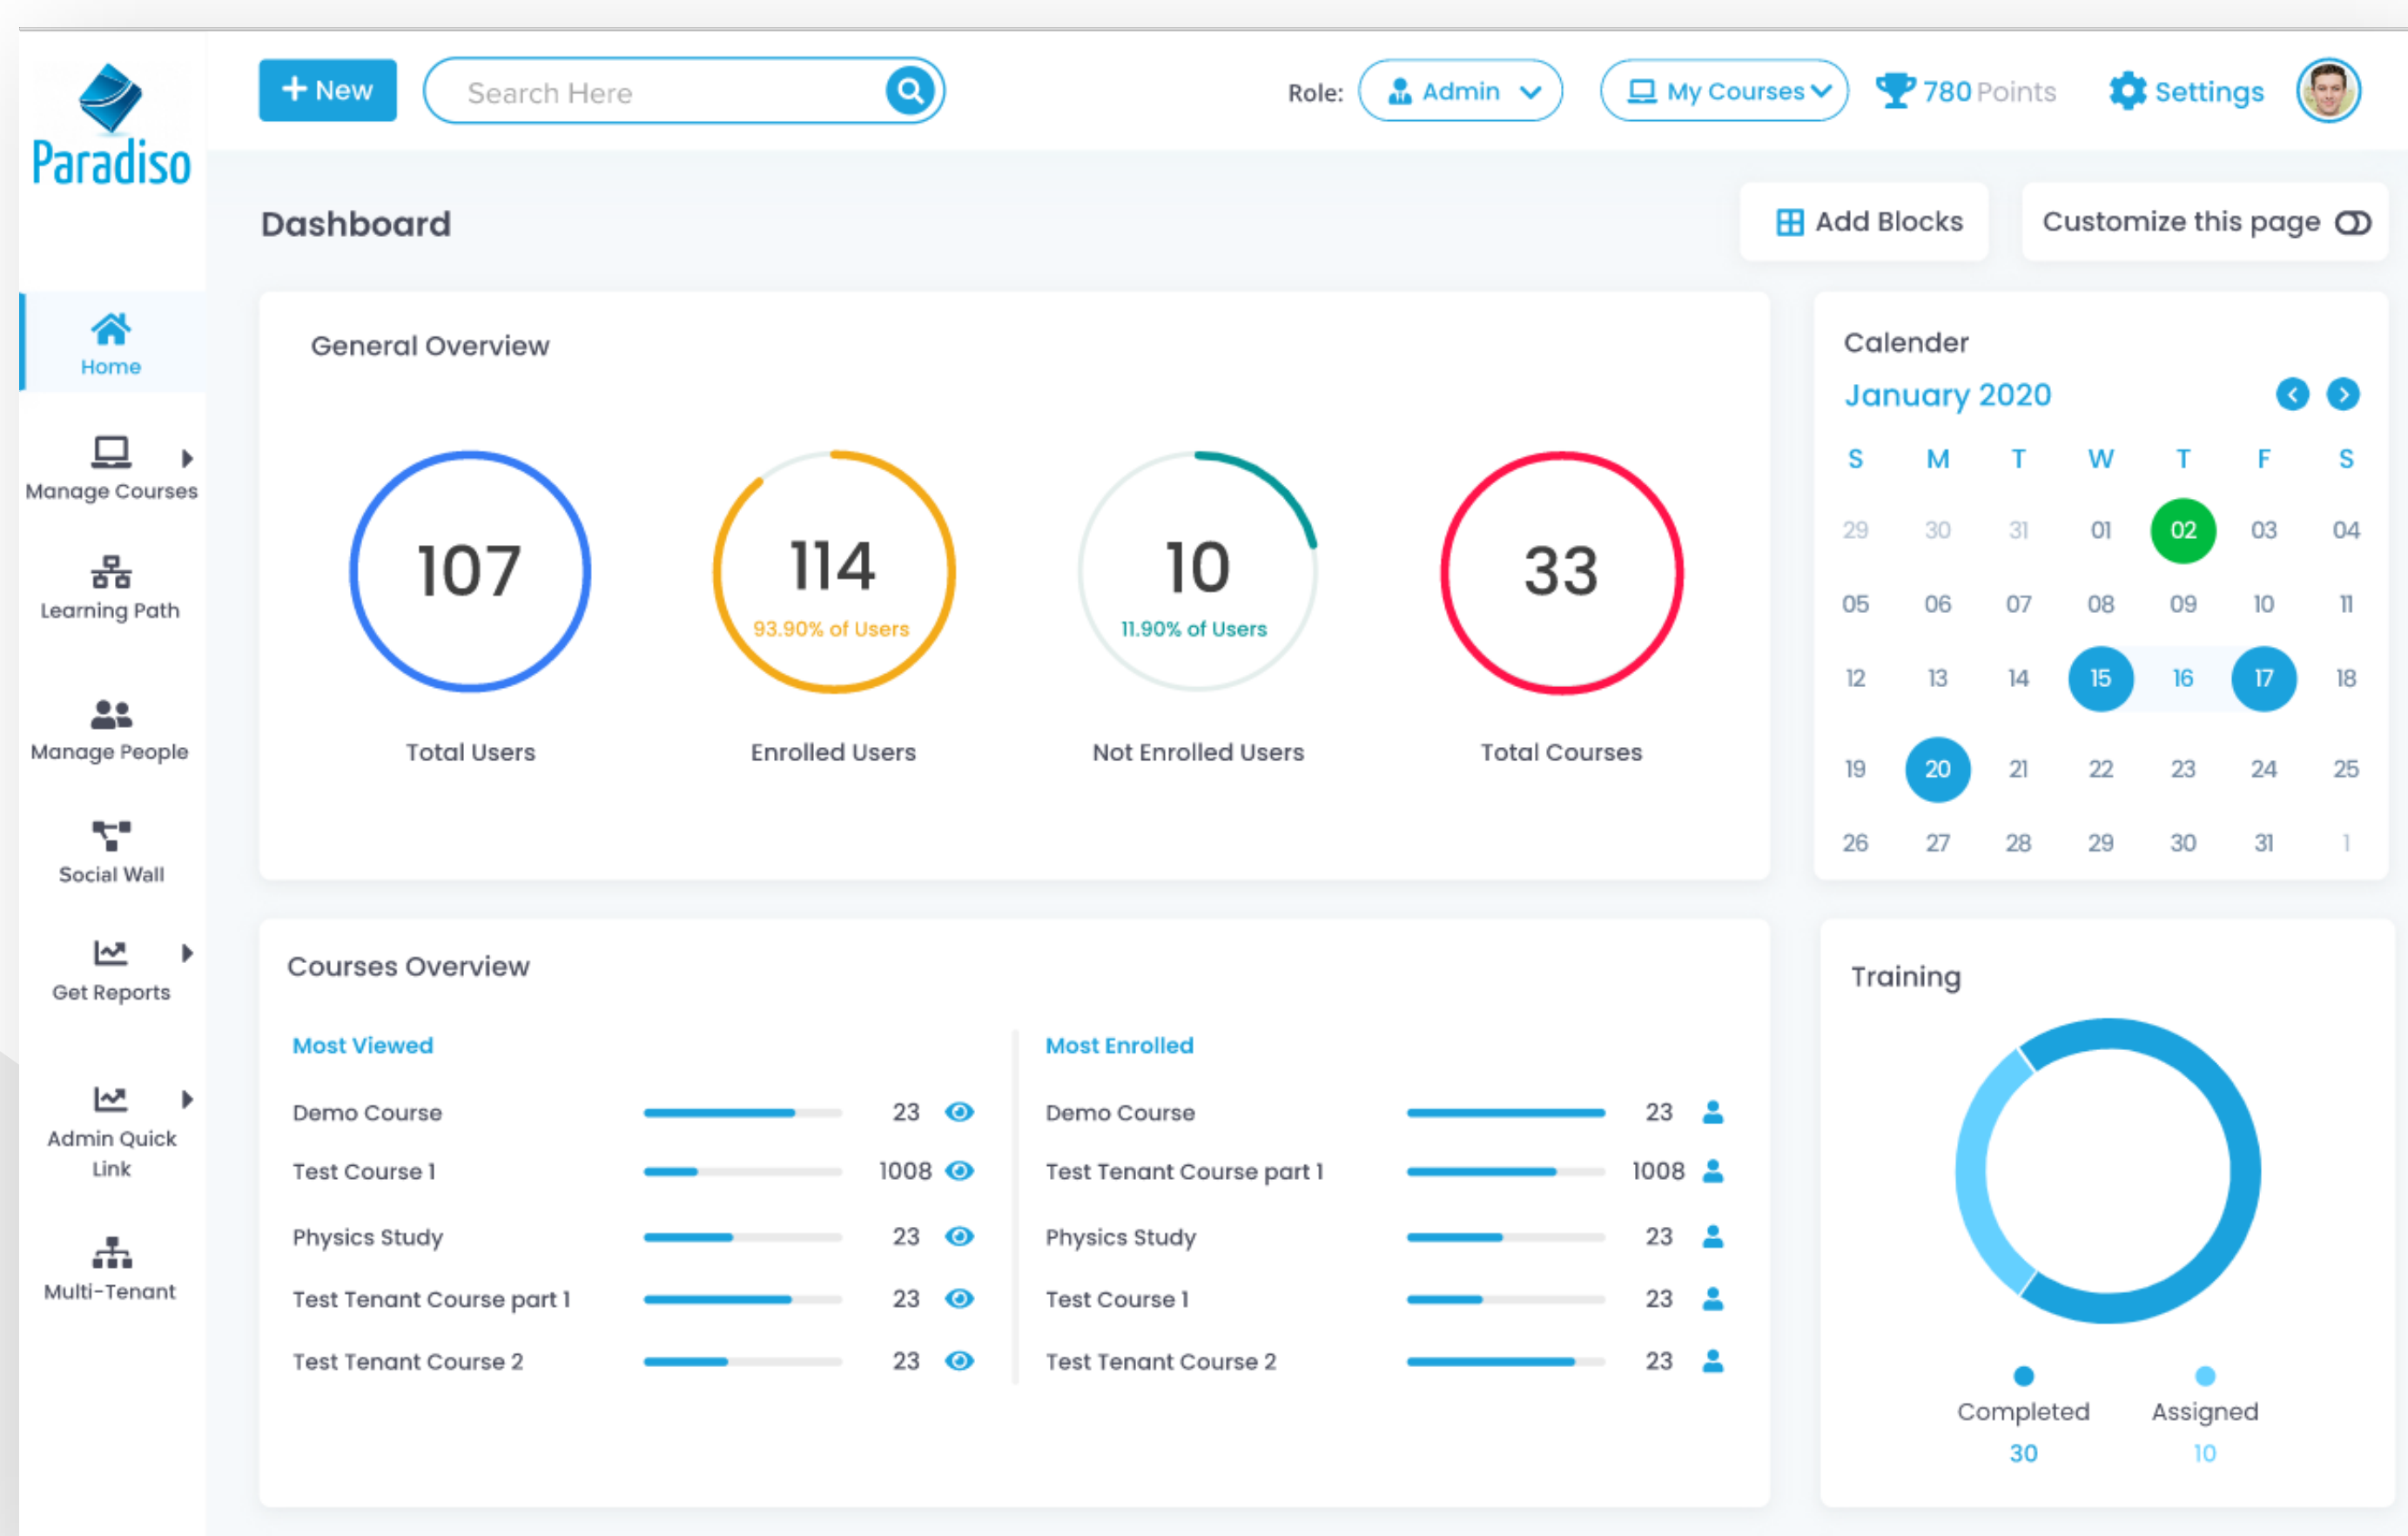

Why Paradiso LMS?

If you are looking to increase your ROI (Return of Investment), user satisfaction, retention and save time and resources, Paradiso LMS is the answer to your prayers. With all the features and possibilities that it offers, you don't have to lookfor any other software. Here are some of the key features that our eLearning Software has to offer:
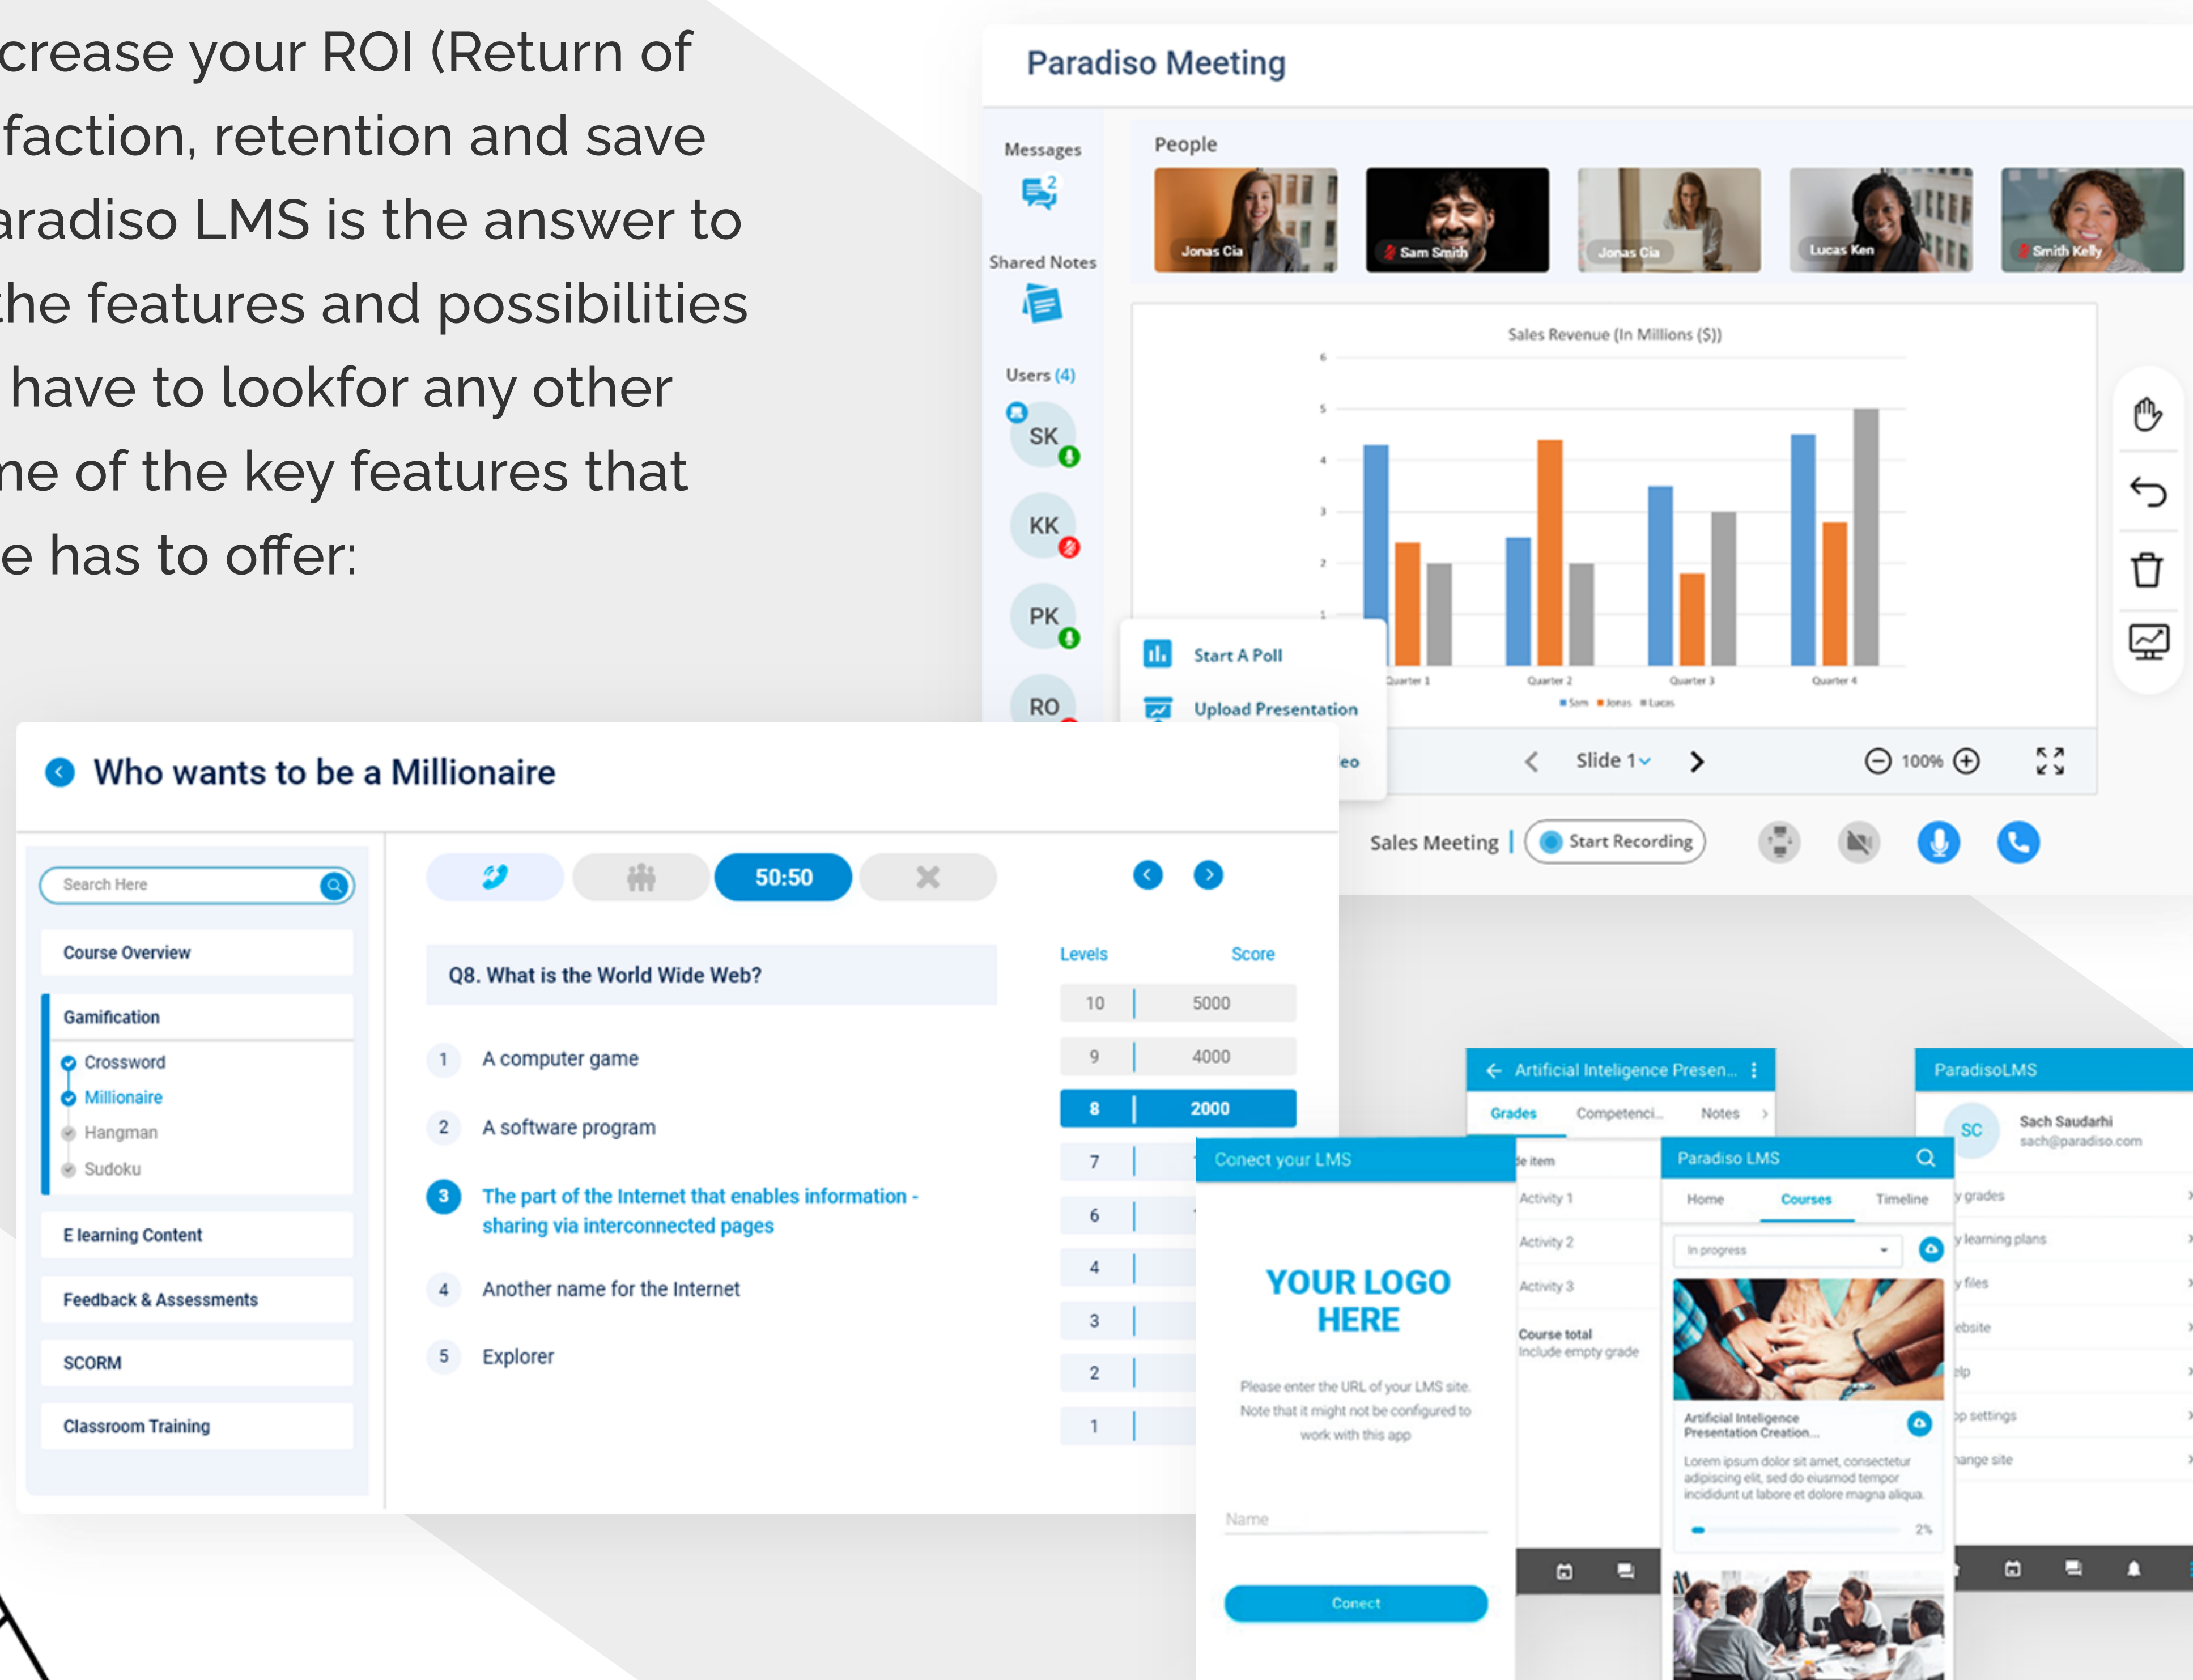

Paradiso ONE Platform

Paradiso ONE Platform is an easy to use, highly customizable, secure, scalable and integrated enterprise level SINGLE Corporate Training Platform which can fulfill complex needs of employee and customer training for medium to large enterprises. This platform needs to be able to provide end to end solution including skill gap analysis, automatic training assignment, online and offline training management, analytics, social and informal learning through curated content and off-the-shelf course library.

Learning Management System

Learning Management System offers Structured Learning. It provides ease of administration by automating processes, an easy-to-use interface, boosts compliance, and fastens the onboarding process. Paradiso LMS offers astounding features like gamification, social learning, blended learning, learning path, performance reports, etc.

Training Management System

Training Management System offers Virtual Instructor-Led Training for employees, customers, or partners. The LMS and video conferencing tool integration offer engaging, immersive, interactive, flexible, and cost-effective learning. ILT offers interactive whiteboards, polls, quizzes, breakout rooms, gamification, social and collaborative learning.
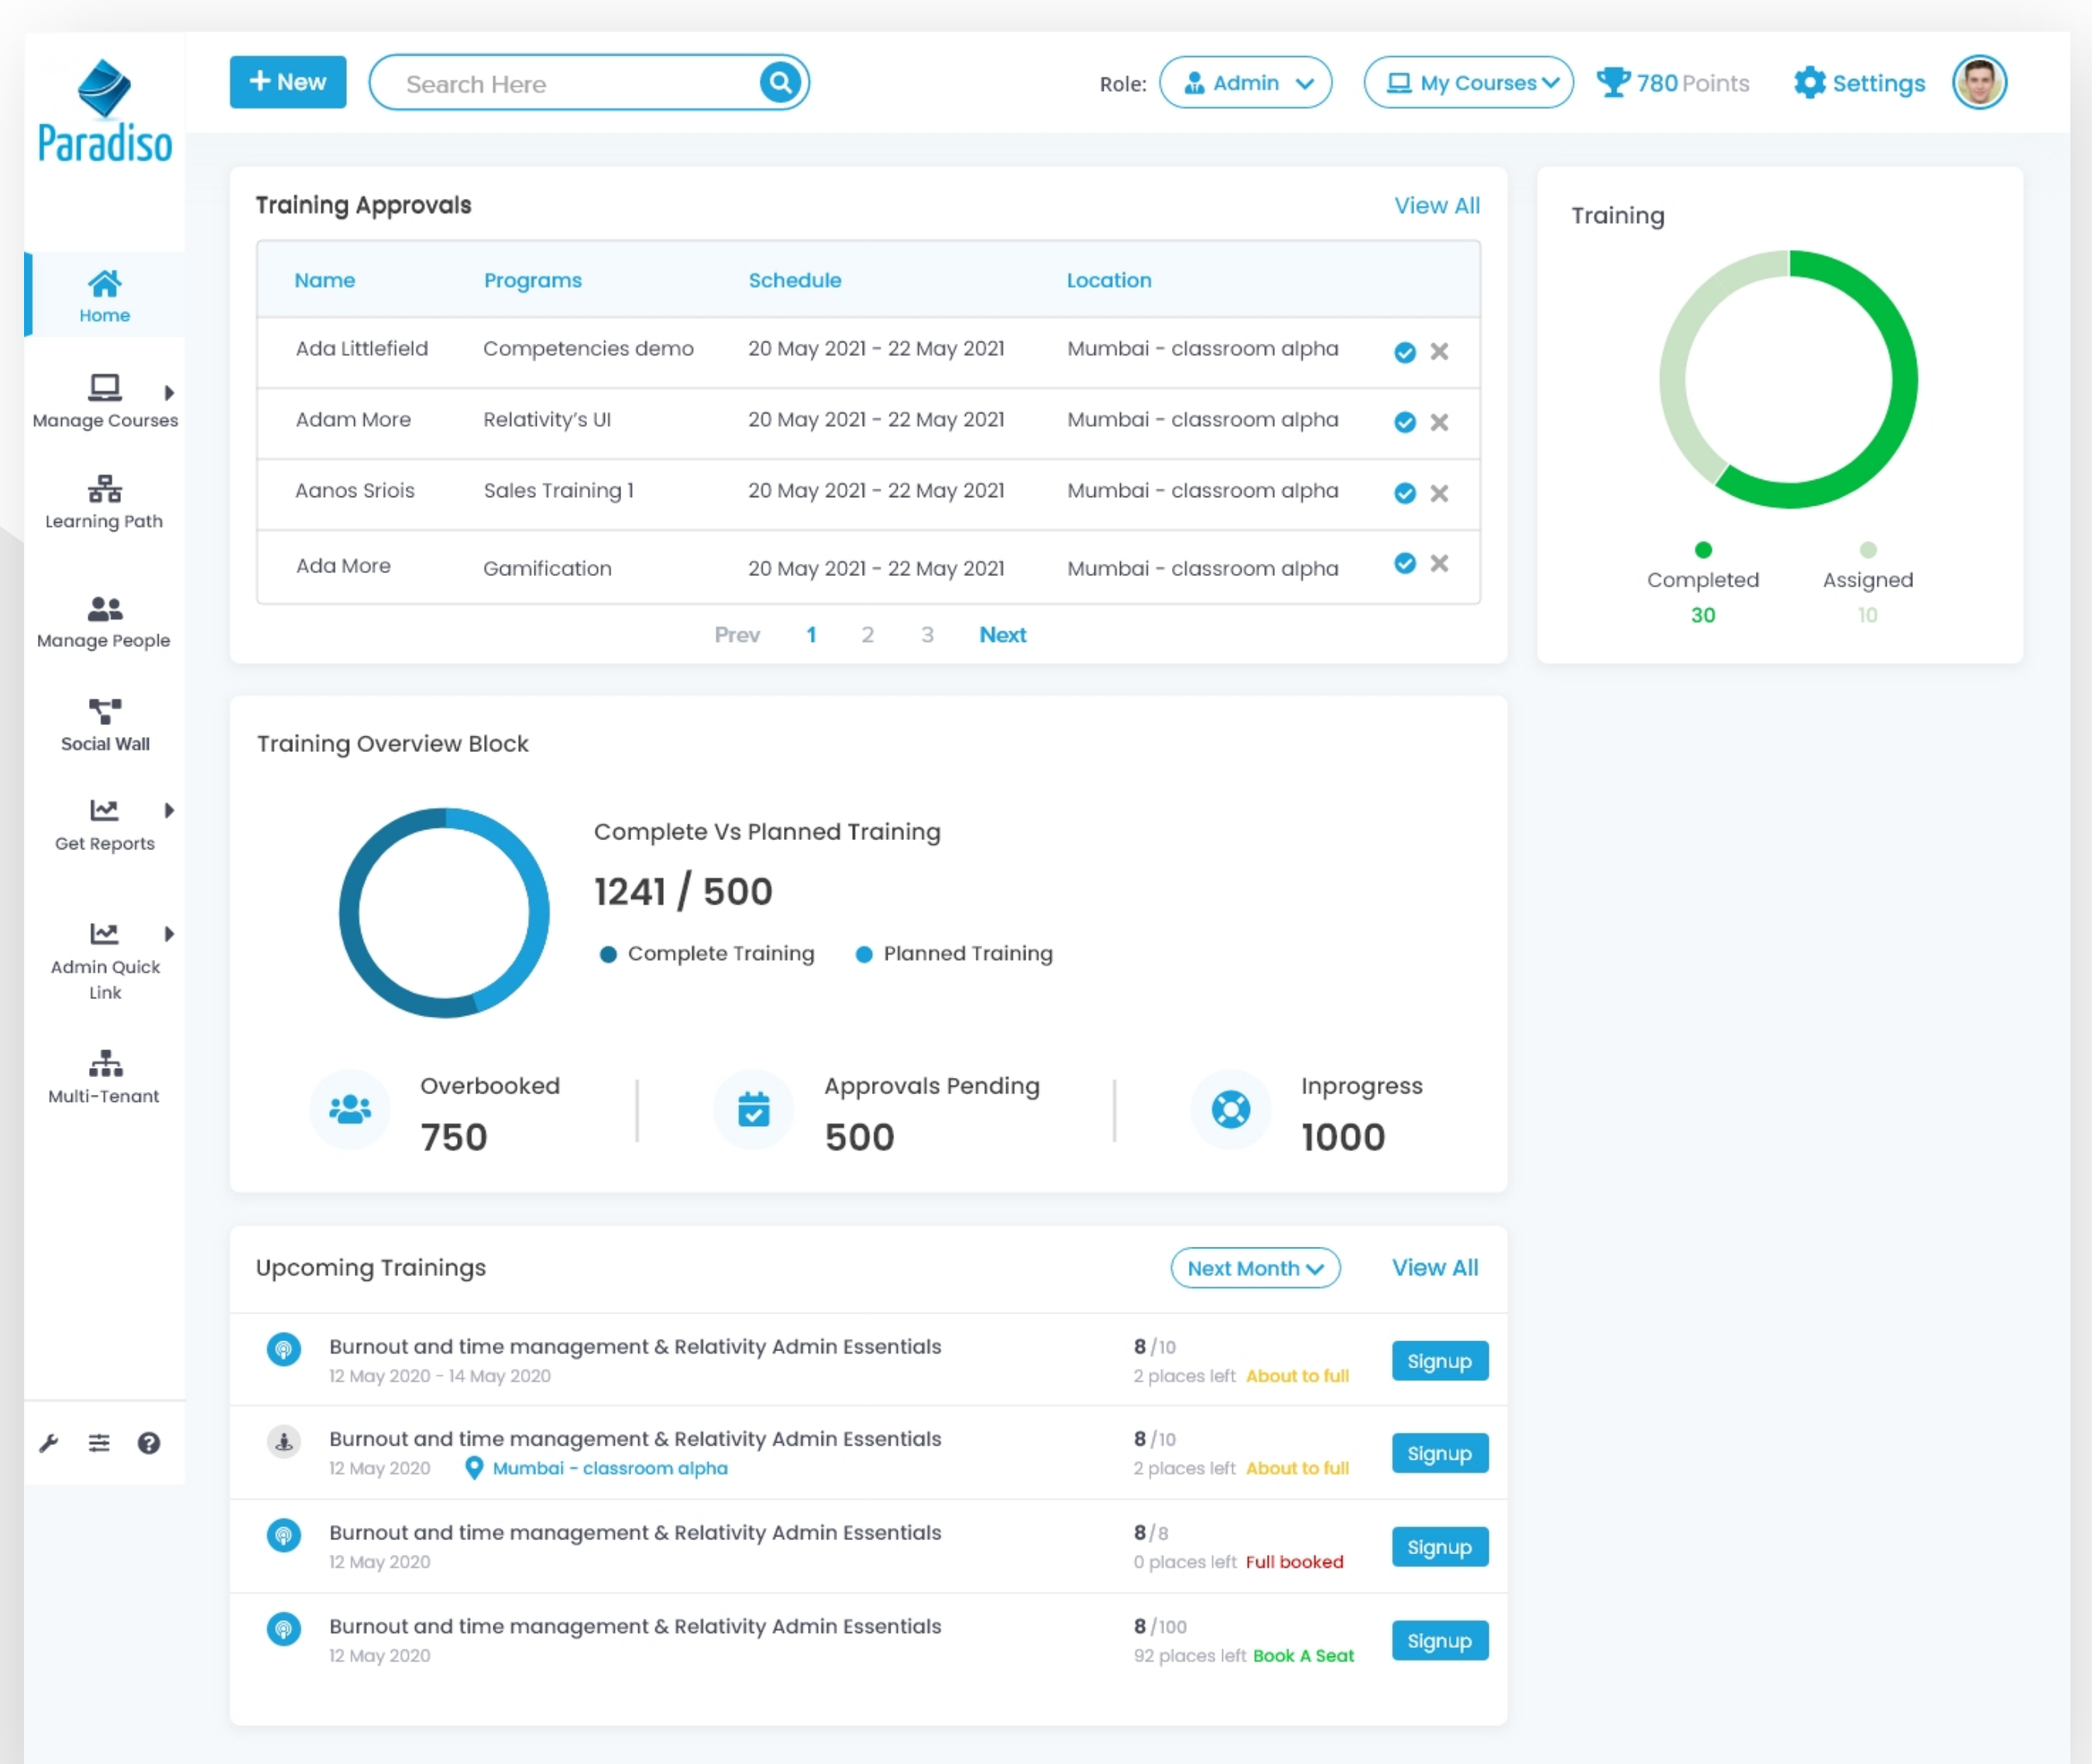

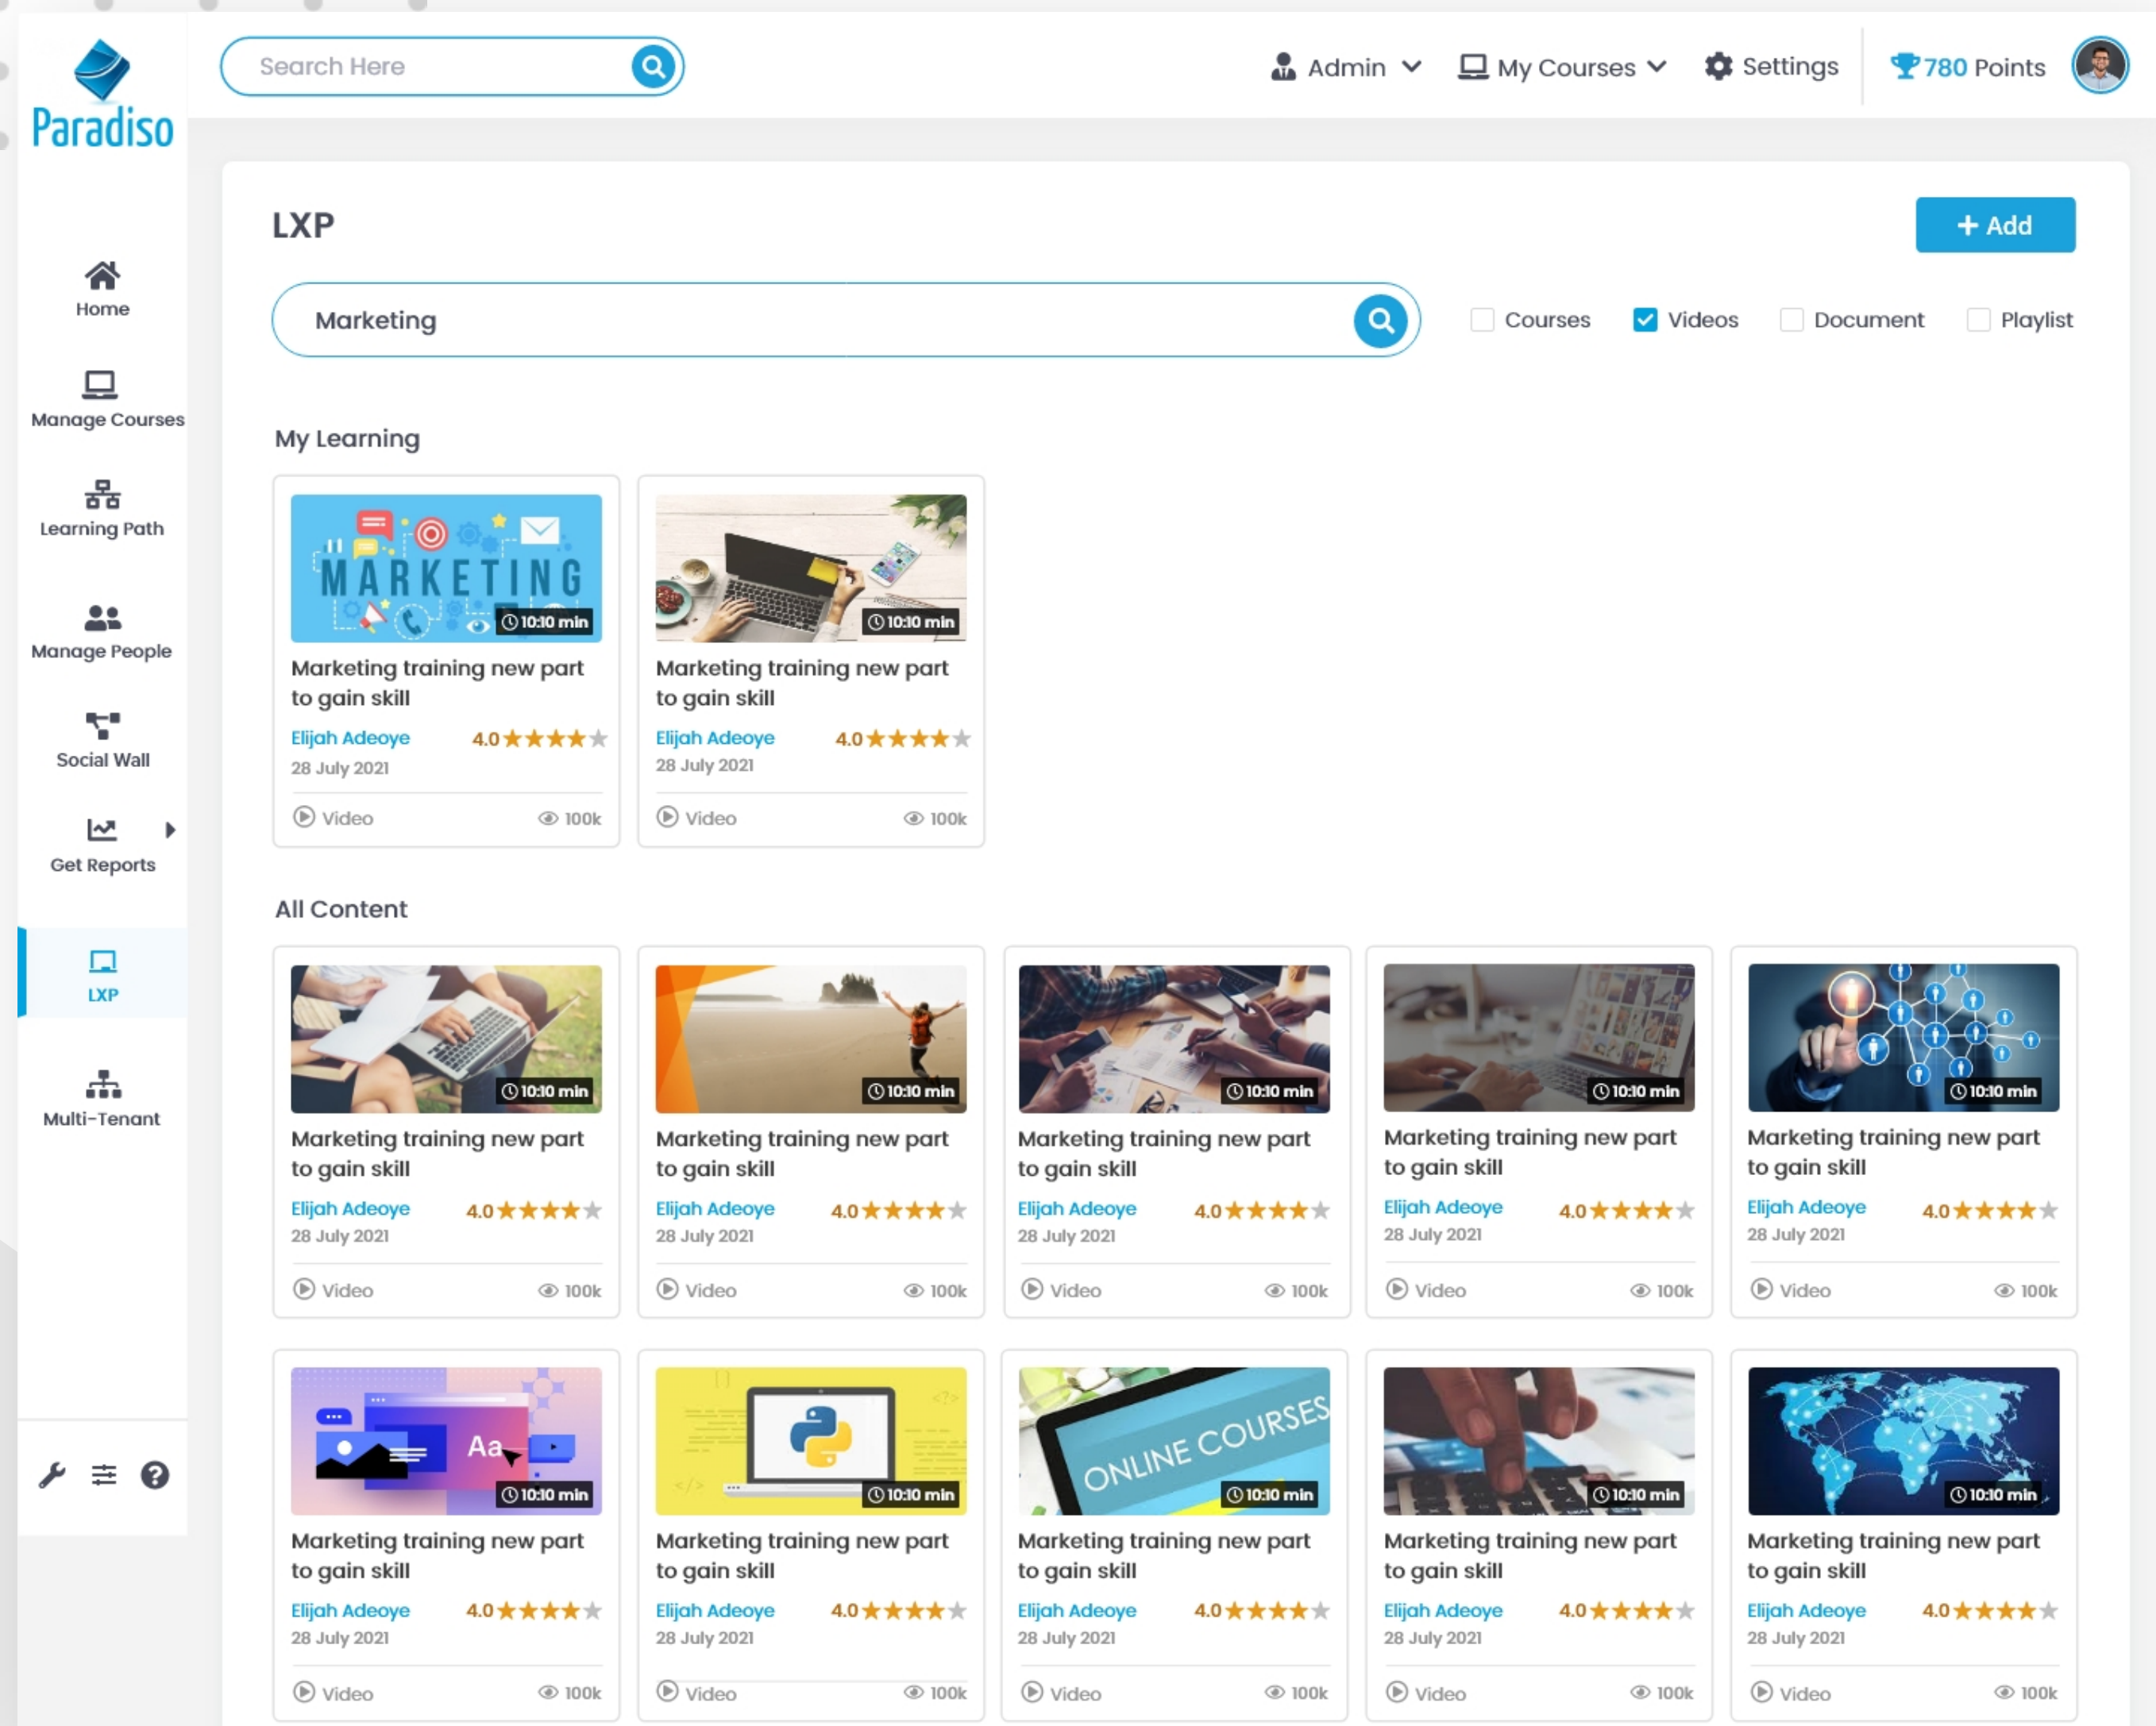

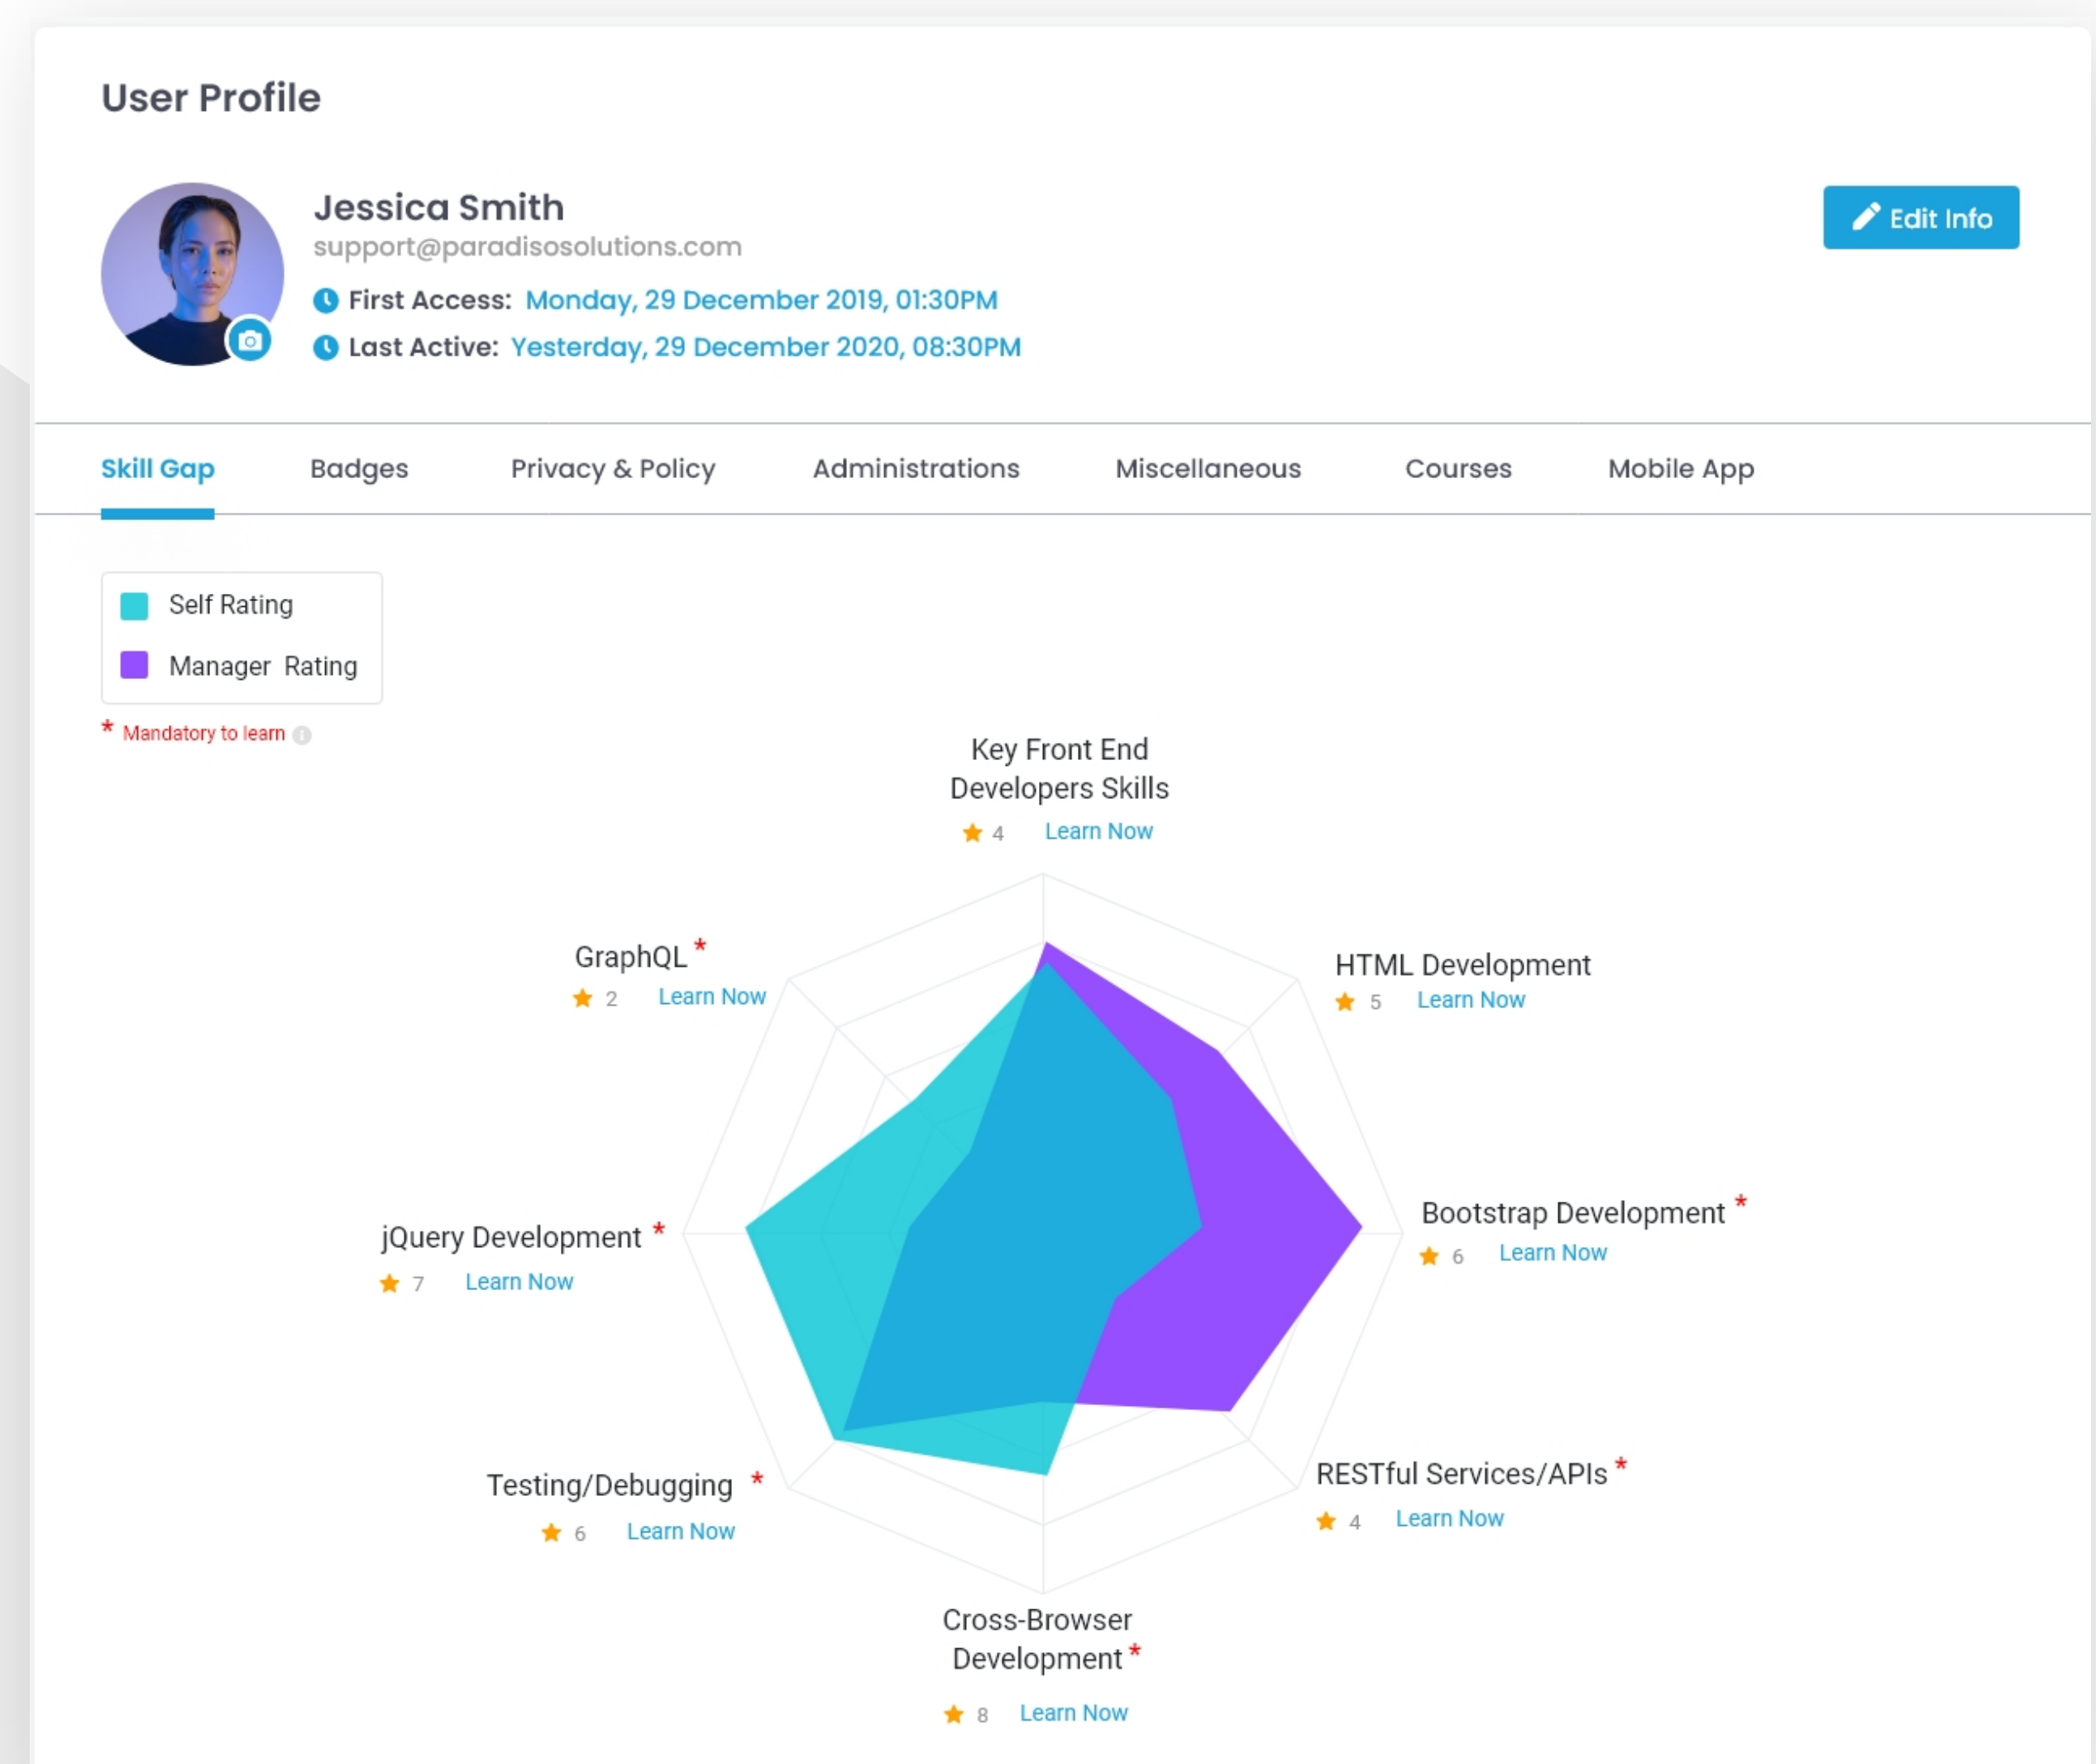

Learning Experience Platform

Learning Experience Platform is an Open Social platform. It includes user-generated content, videos and creates playlists for personalized learning. LXP is AI-driven and supports multiple content types, social learning, integrations like SCORM, AICC, and API. Microlearning, skill gap analysis, and content curation are some of the main features of an LXP.

Skill Gap Analysis

Paradiso platform for skill development provides learning to build skills required for various roles and builds competency among individuals. It involves the use of analytical statistics for skill gap analysis based on ratings. Rating is linked with course recommendations for upskilling.

Gamification

This can help your end user interact better with your content and also increase the knowledge retention, using gaming strategies. They can learn much faster and have fun in the process.
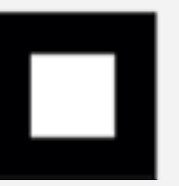

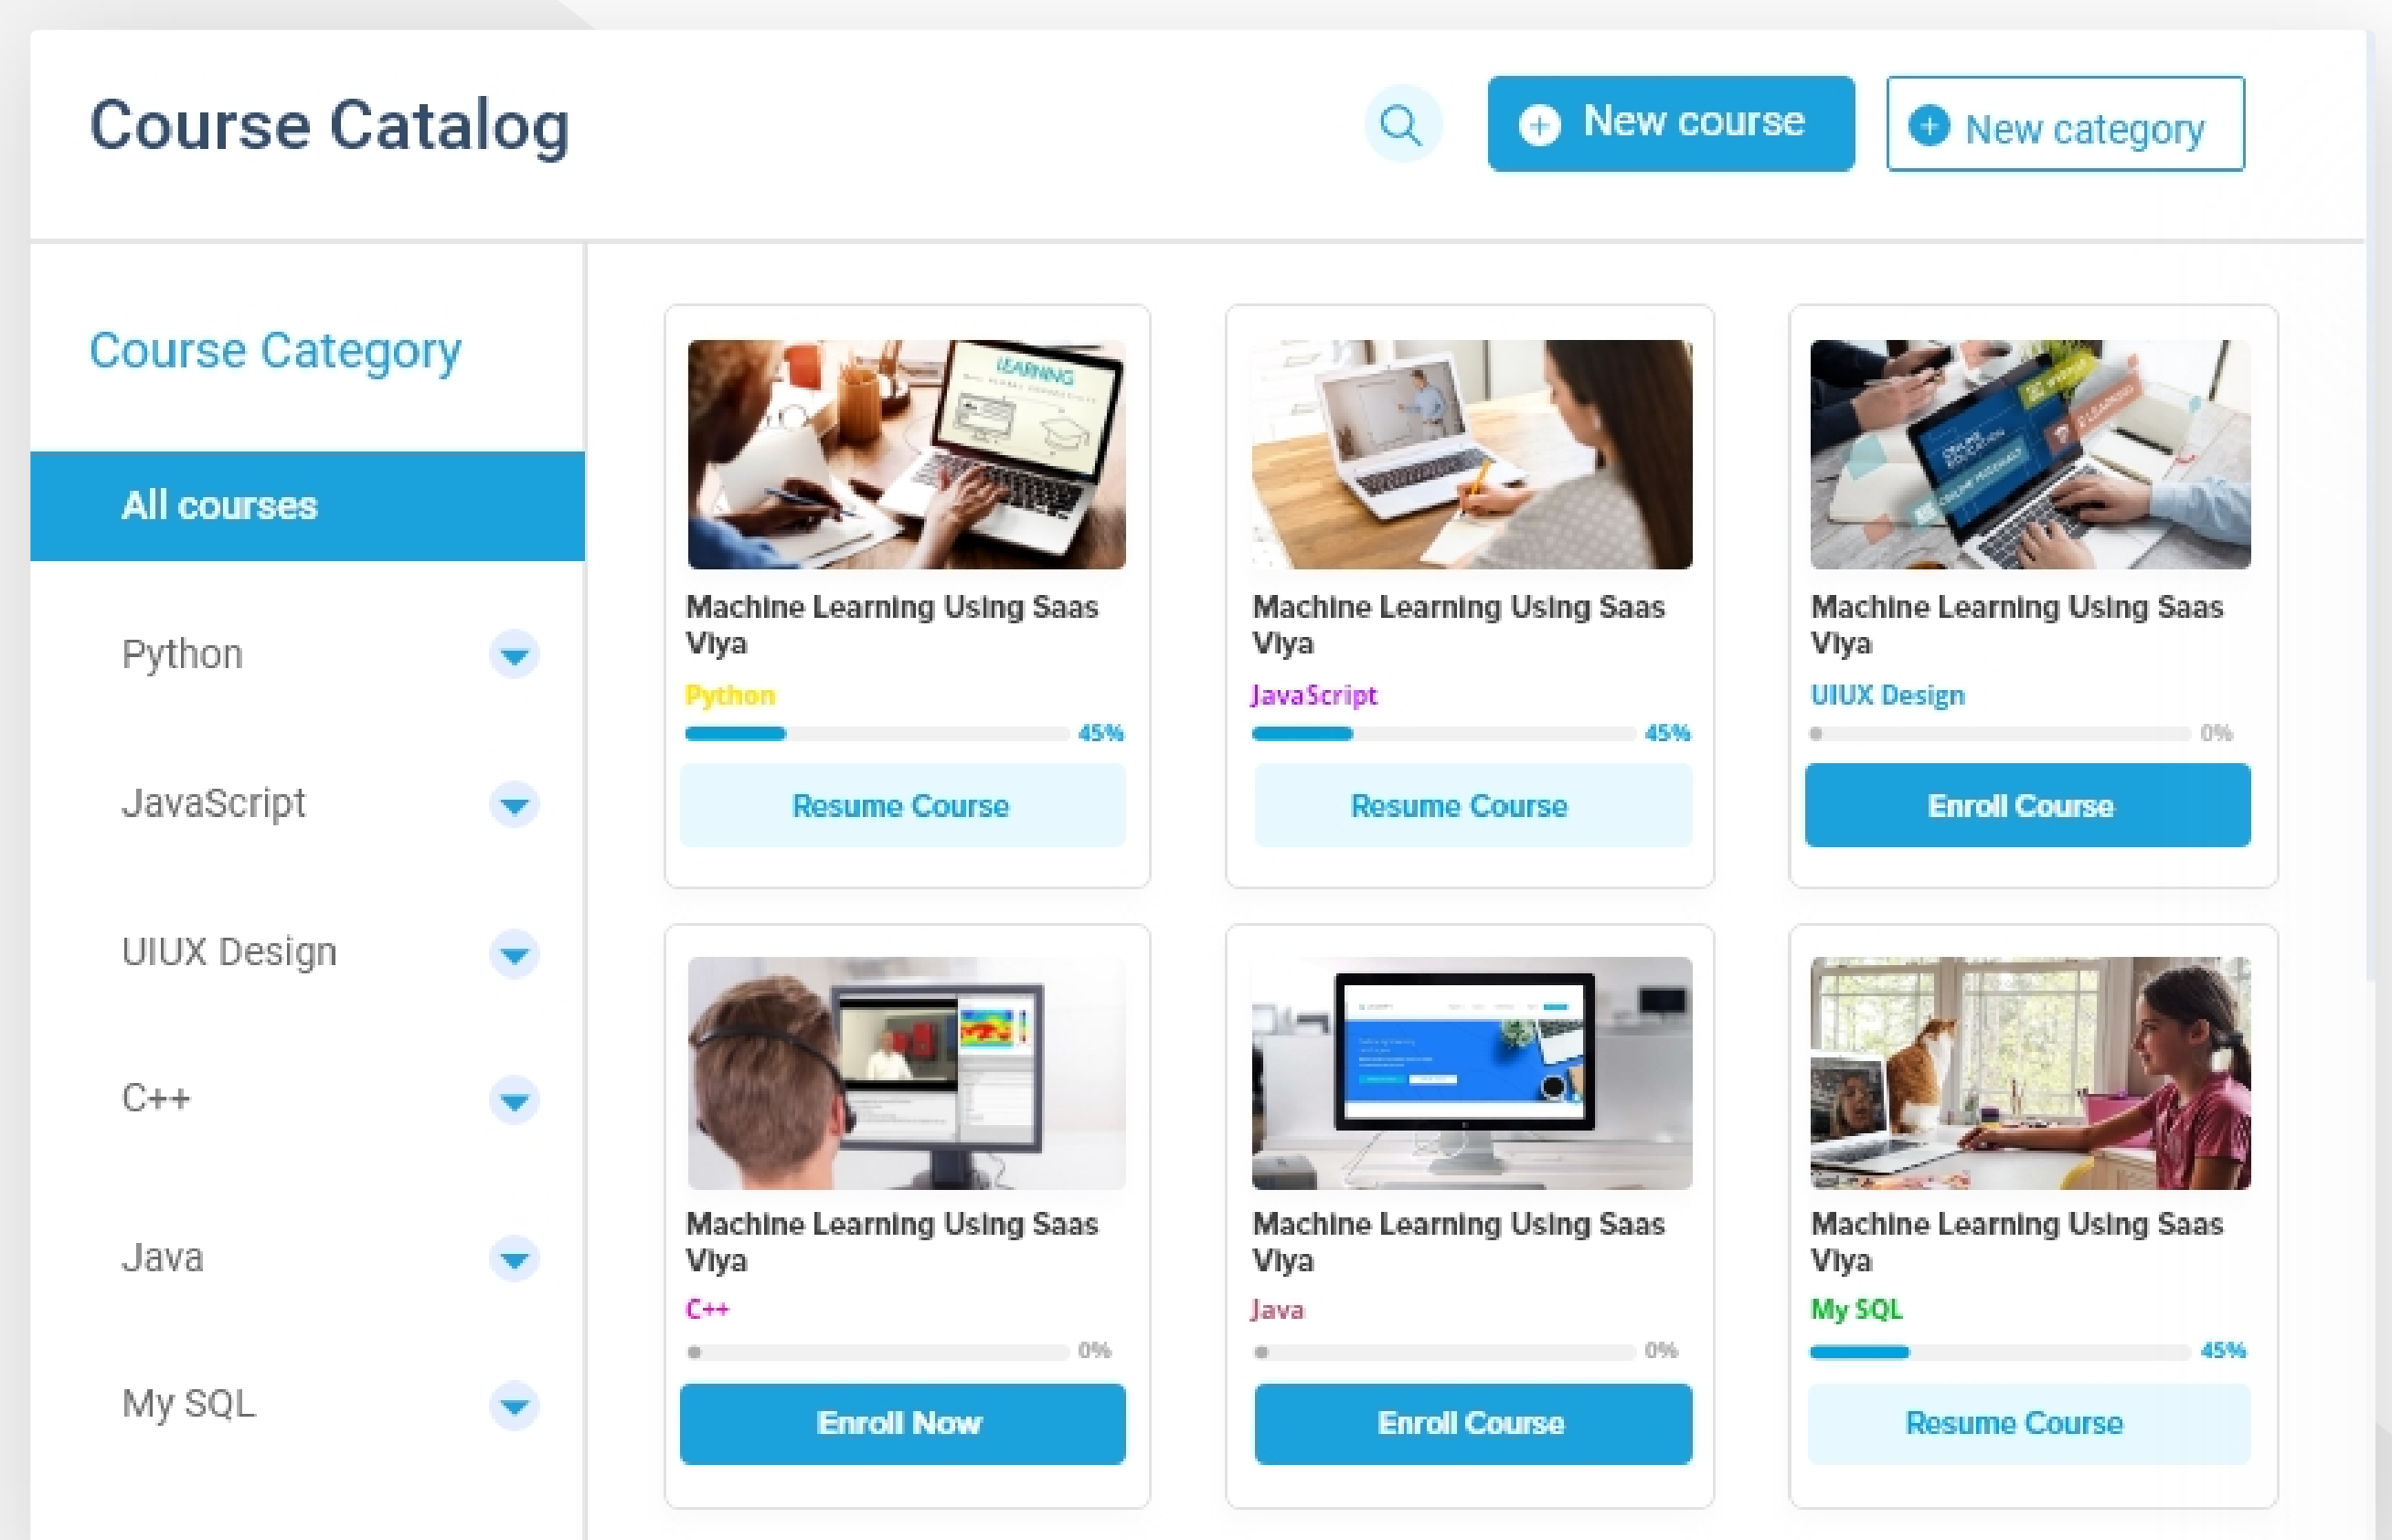

White Label LMS

Paradiso's White Label LMS can be rebranded according to your requirements.

Course Library

5000+ on-demand online training videos covering every business training topic, including communication skills, leadership, and management, sales and customer service, compliance training, anti-harassment and more.

Embedded Support

Most companies have a ticketing system and that is as far as it goes. Also, it client counts with a Project Manager that would help to solve the issues or questions.
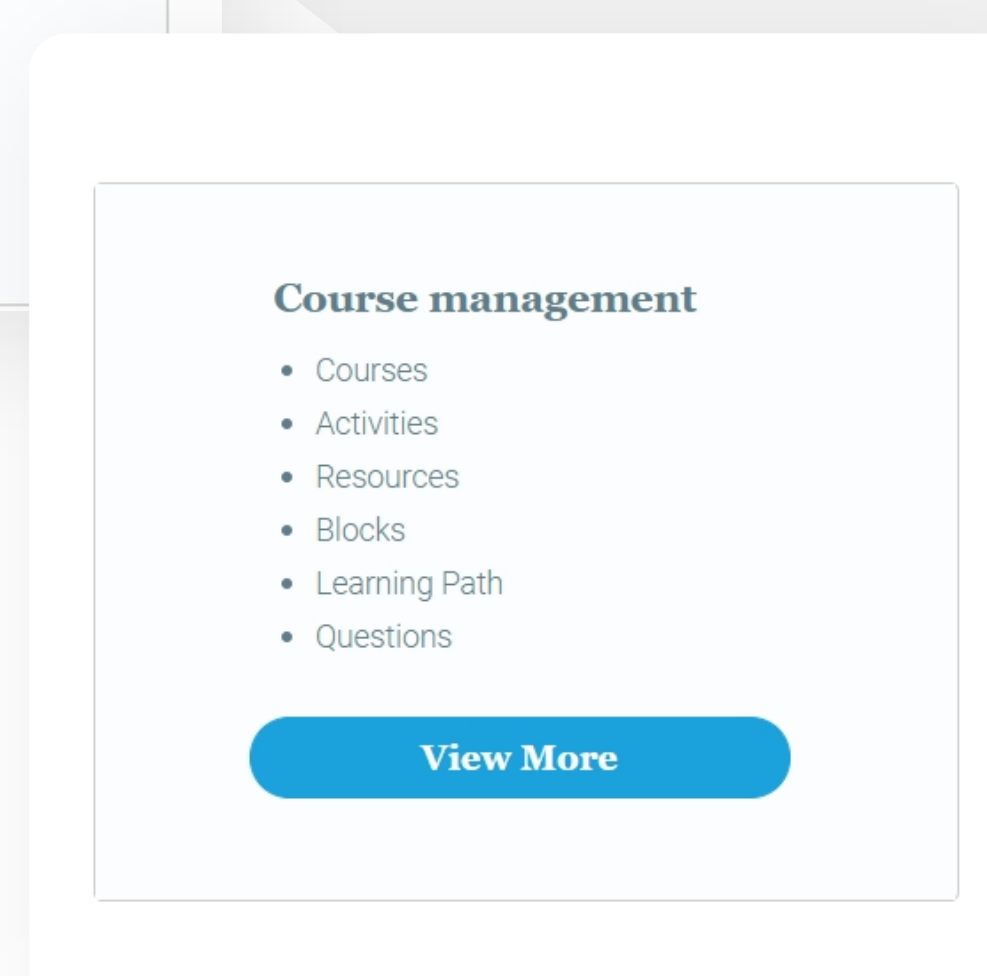

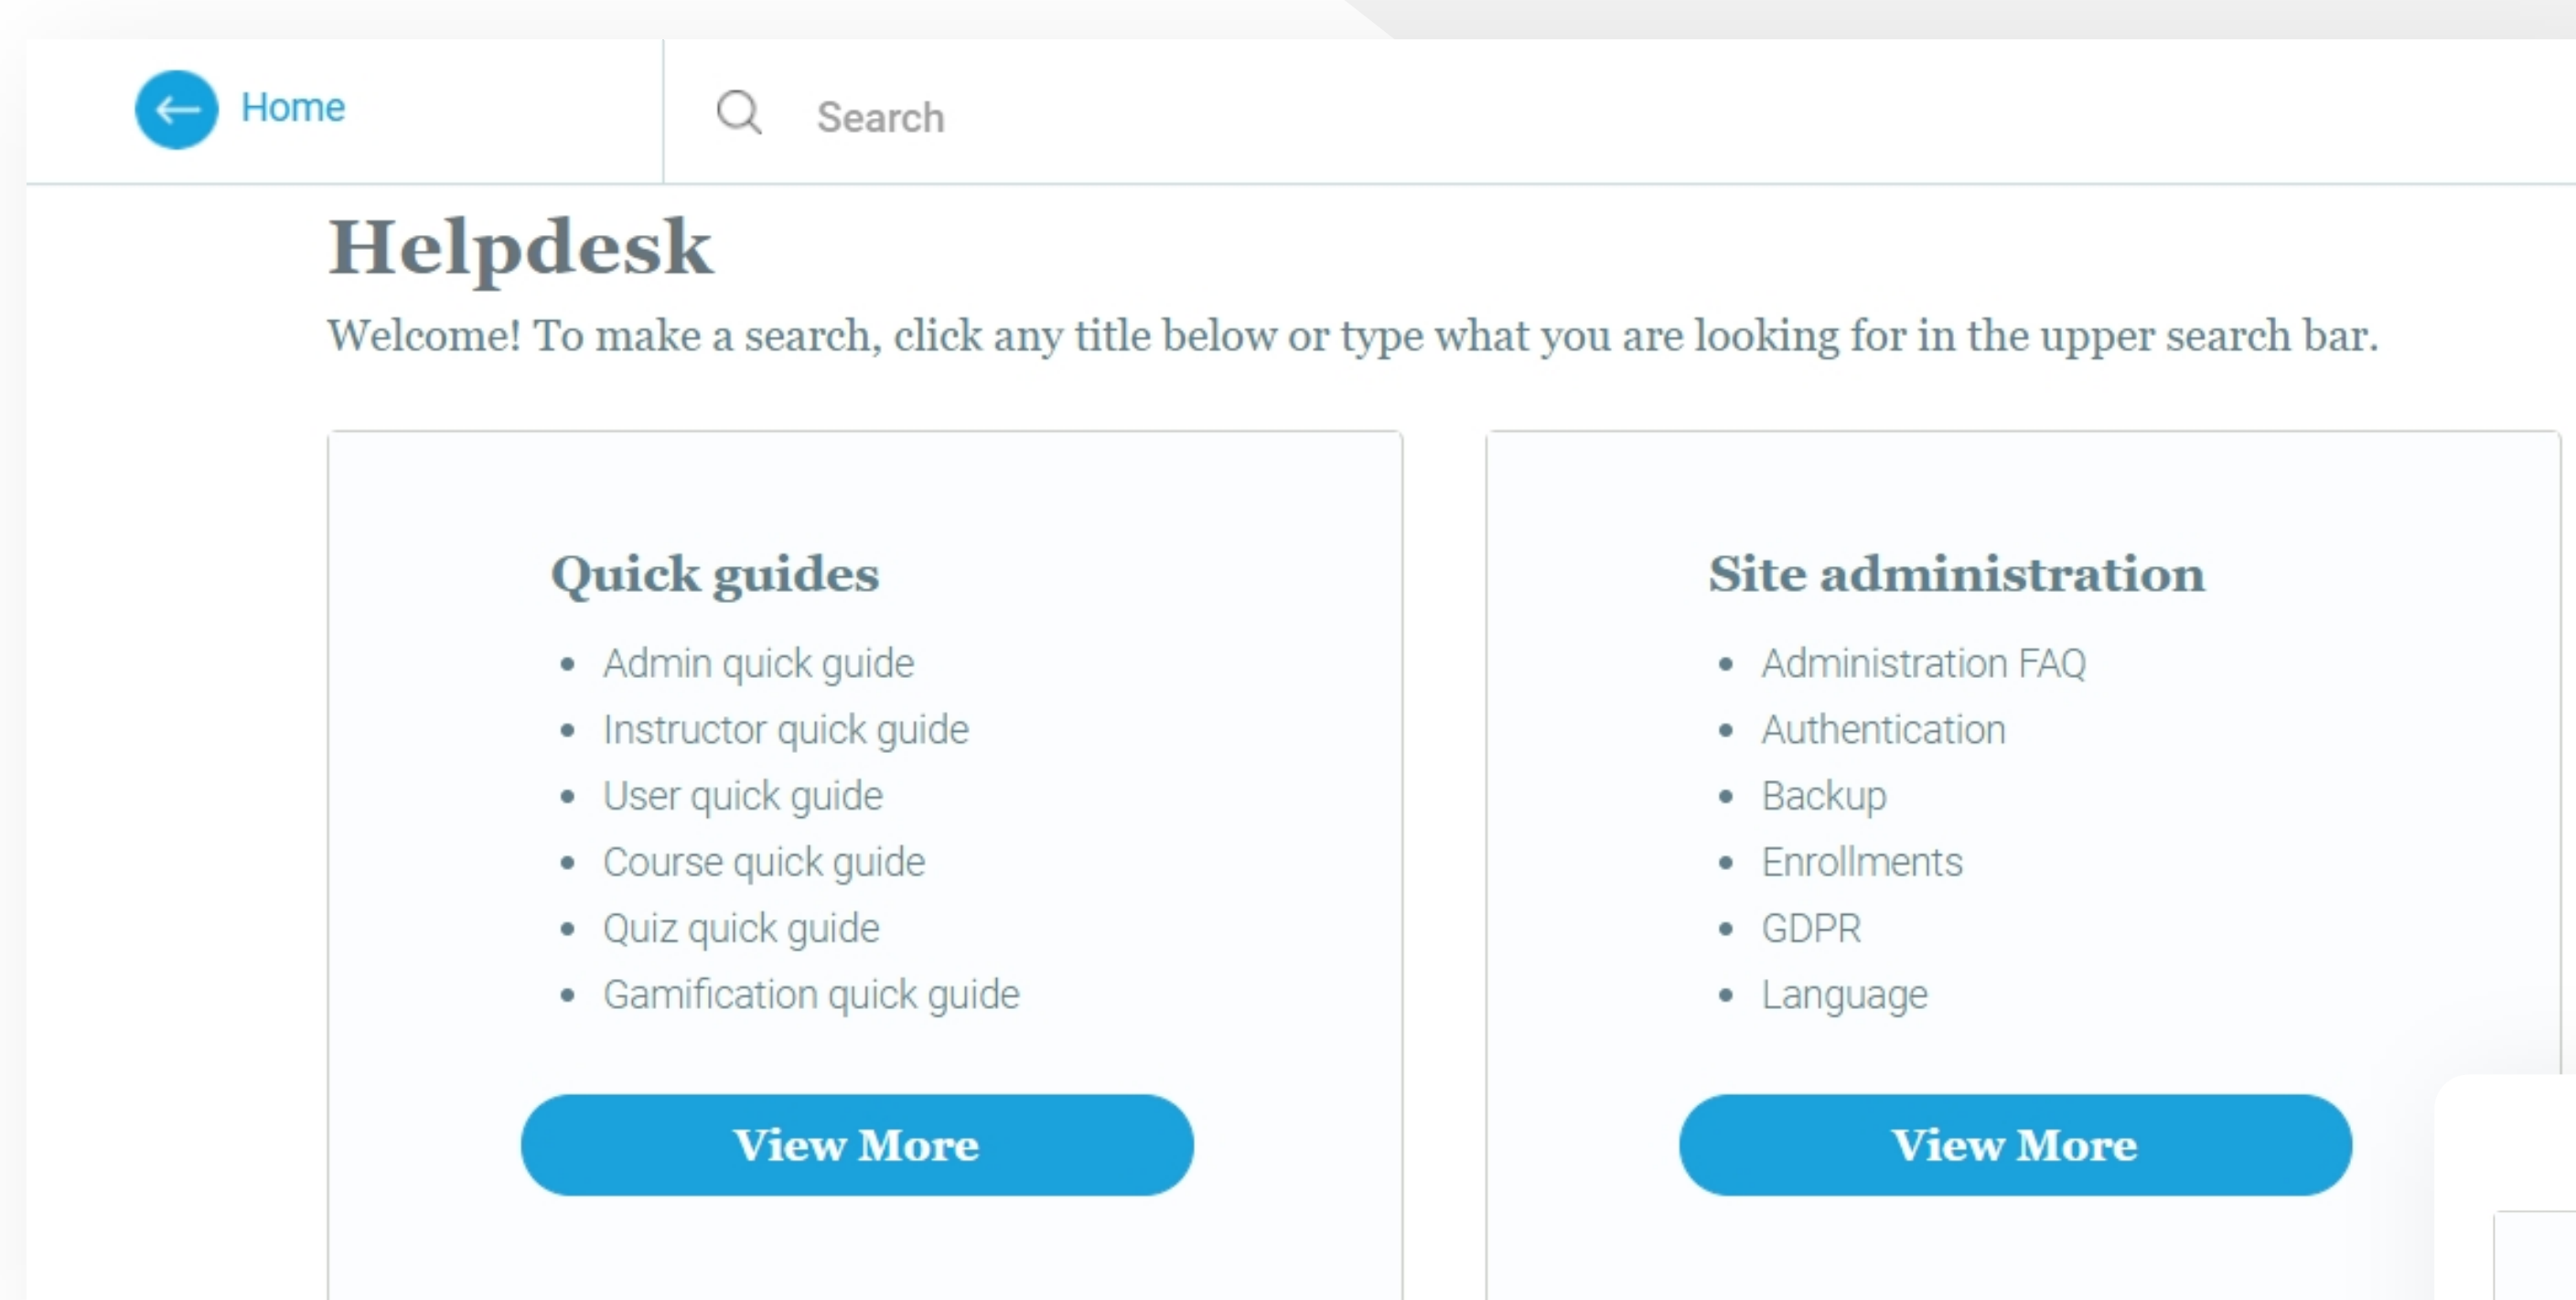

Multiple Integrations

As a very flexible system, it could be integrated with more than a hundred applications, such as Salesforce, Google hangouts, WebEx, Google Analytics, Shopify, Sharepoint, to name a few.
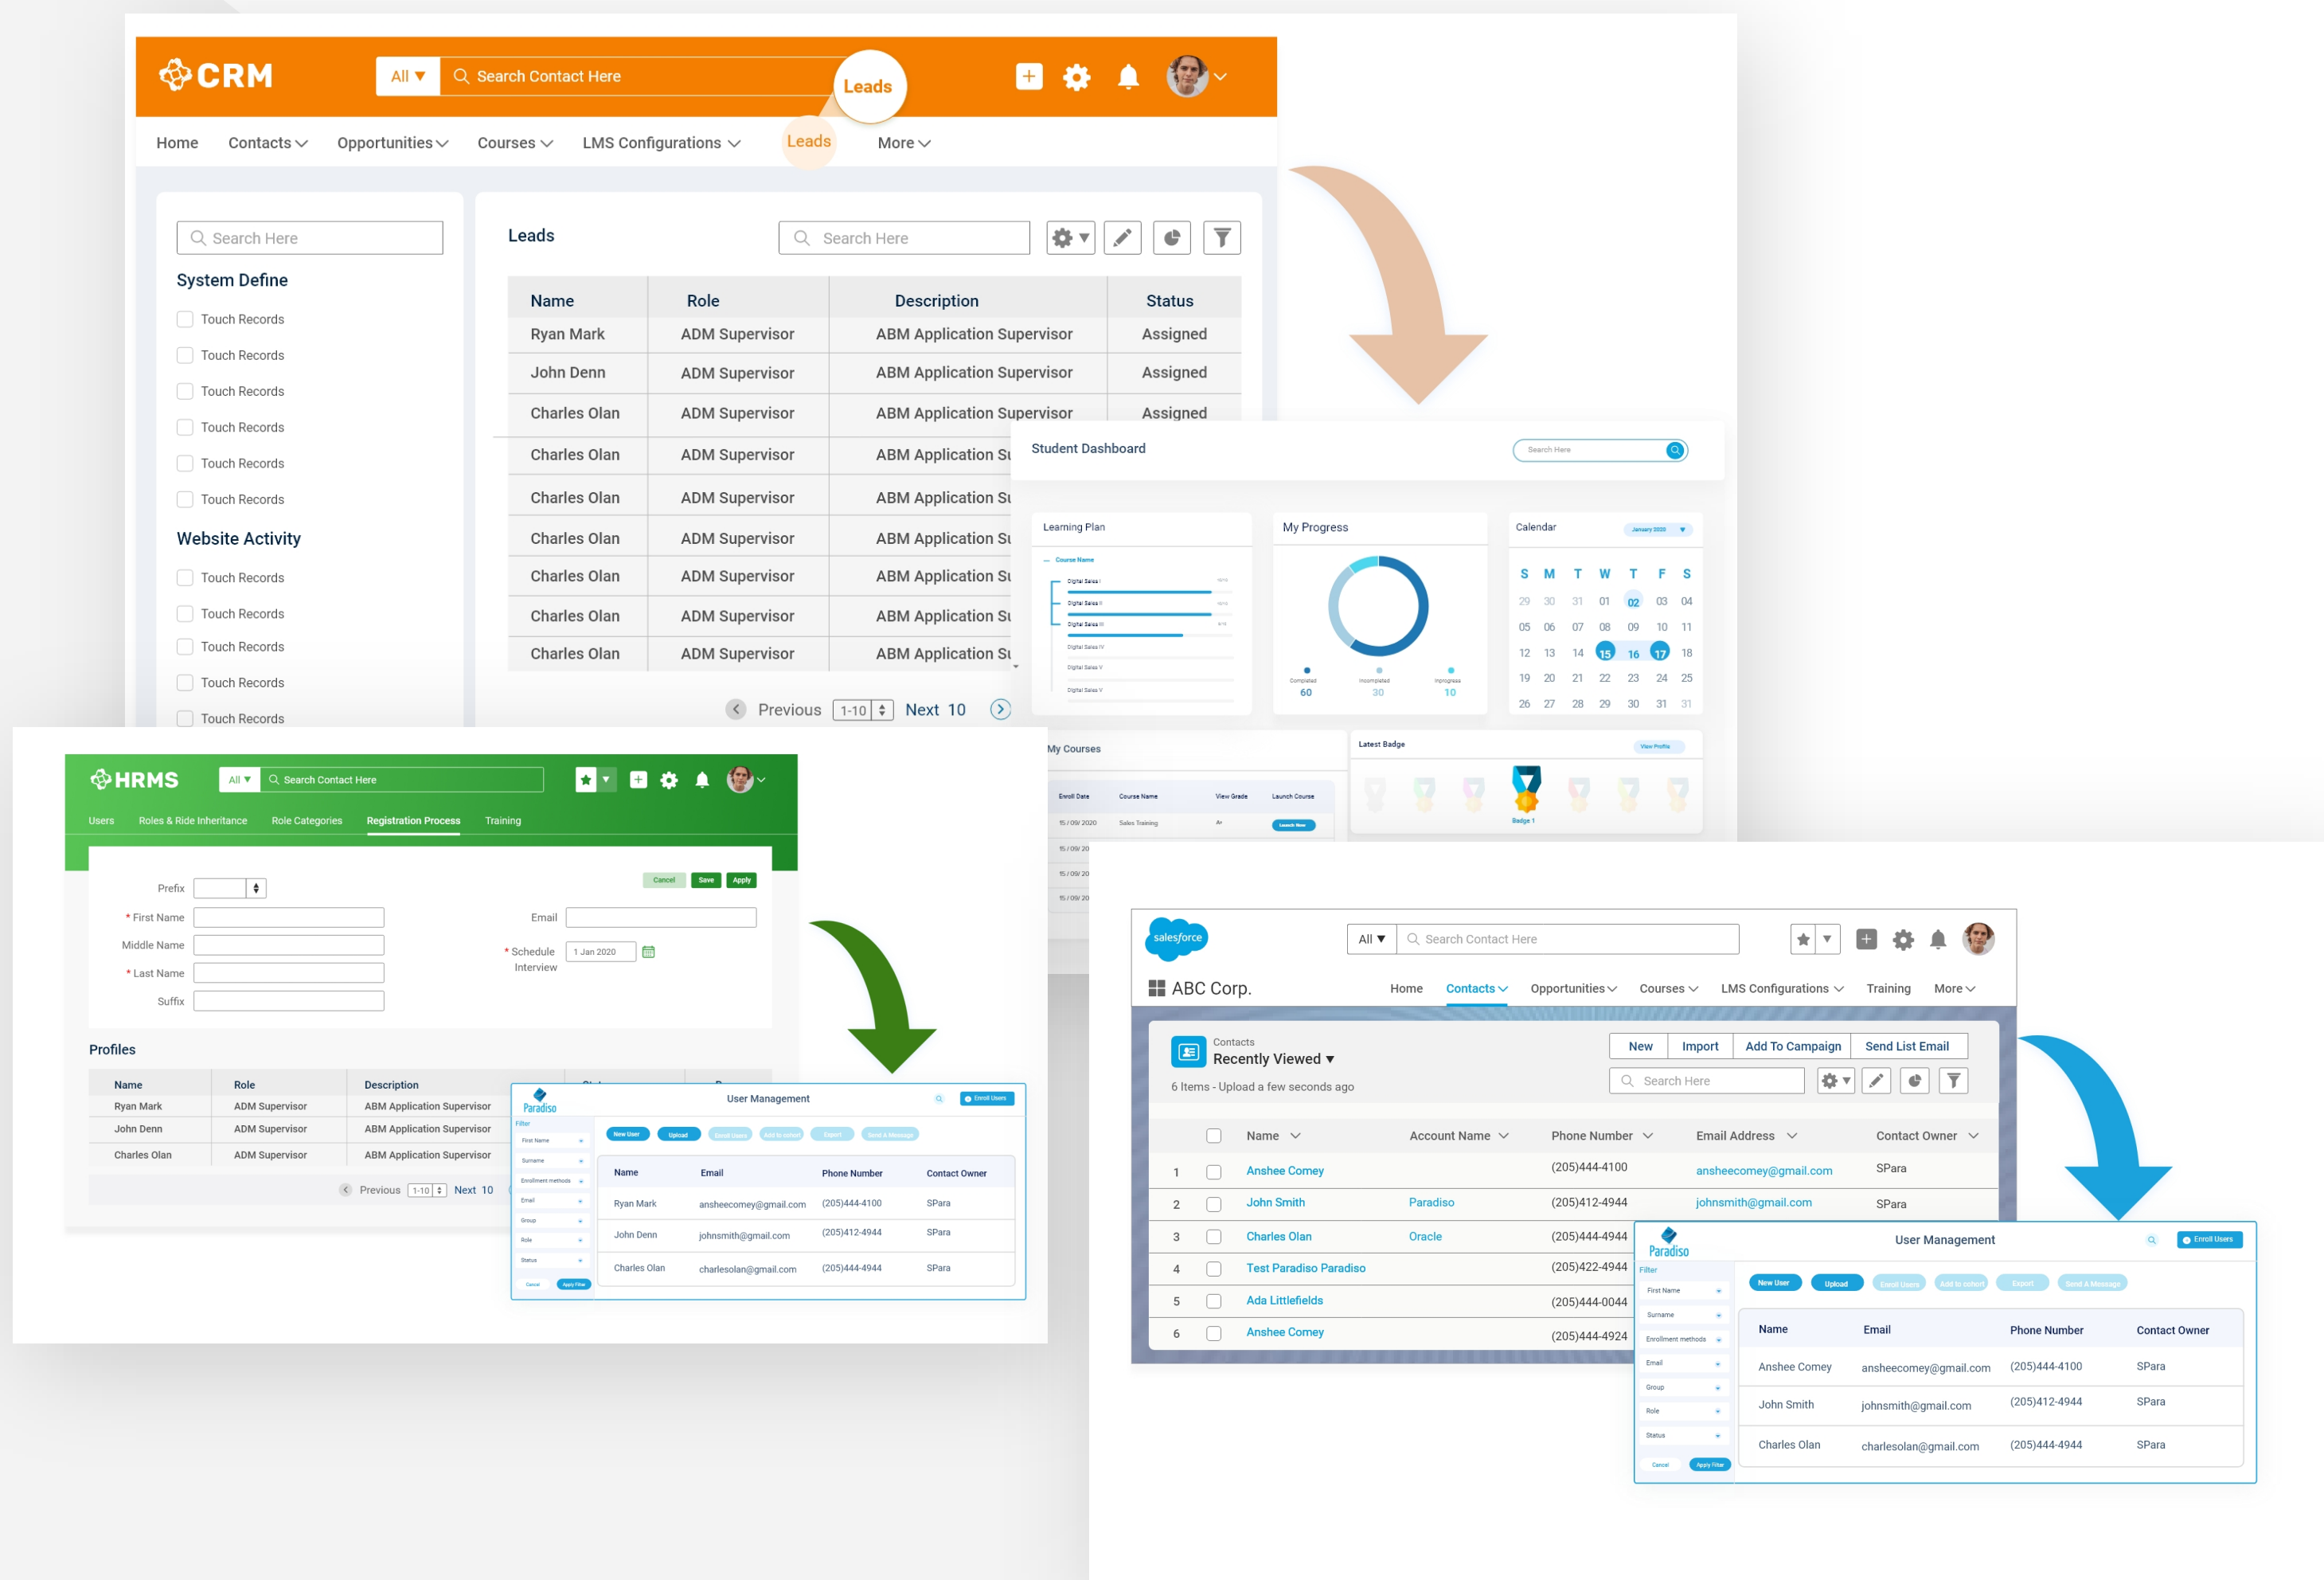

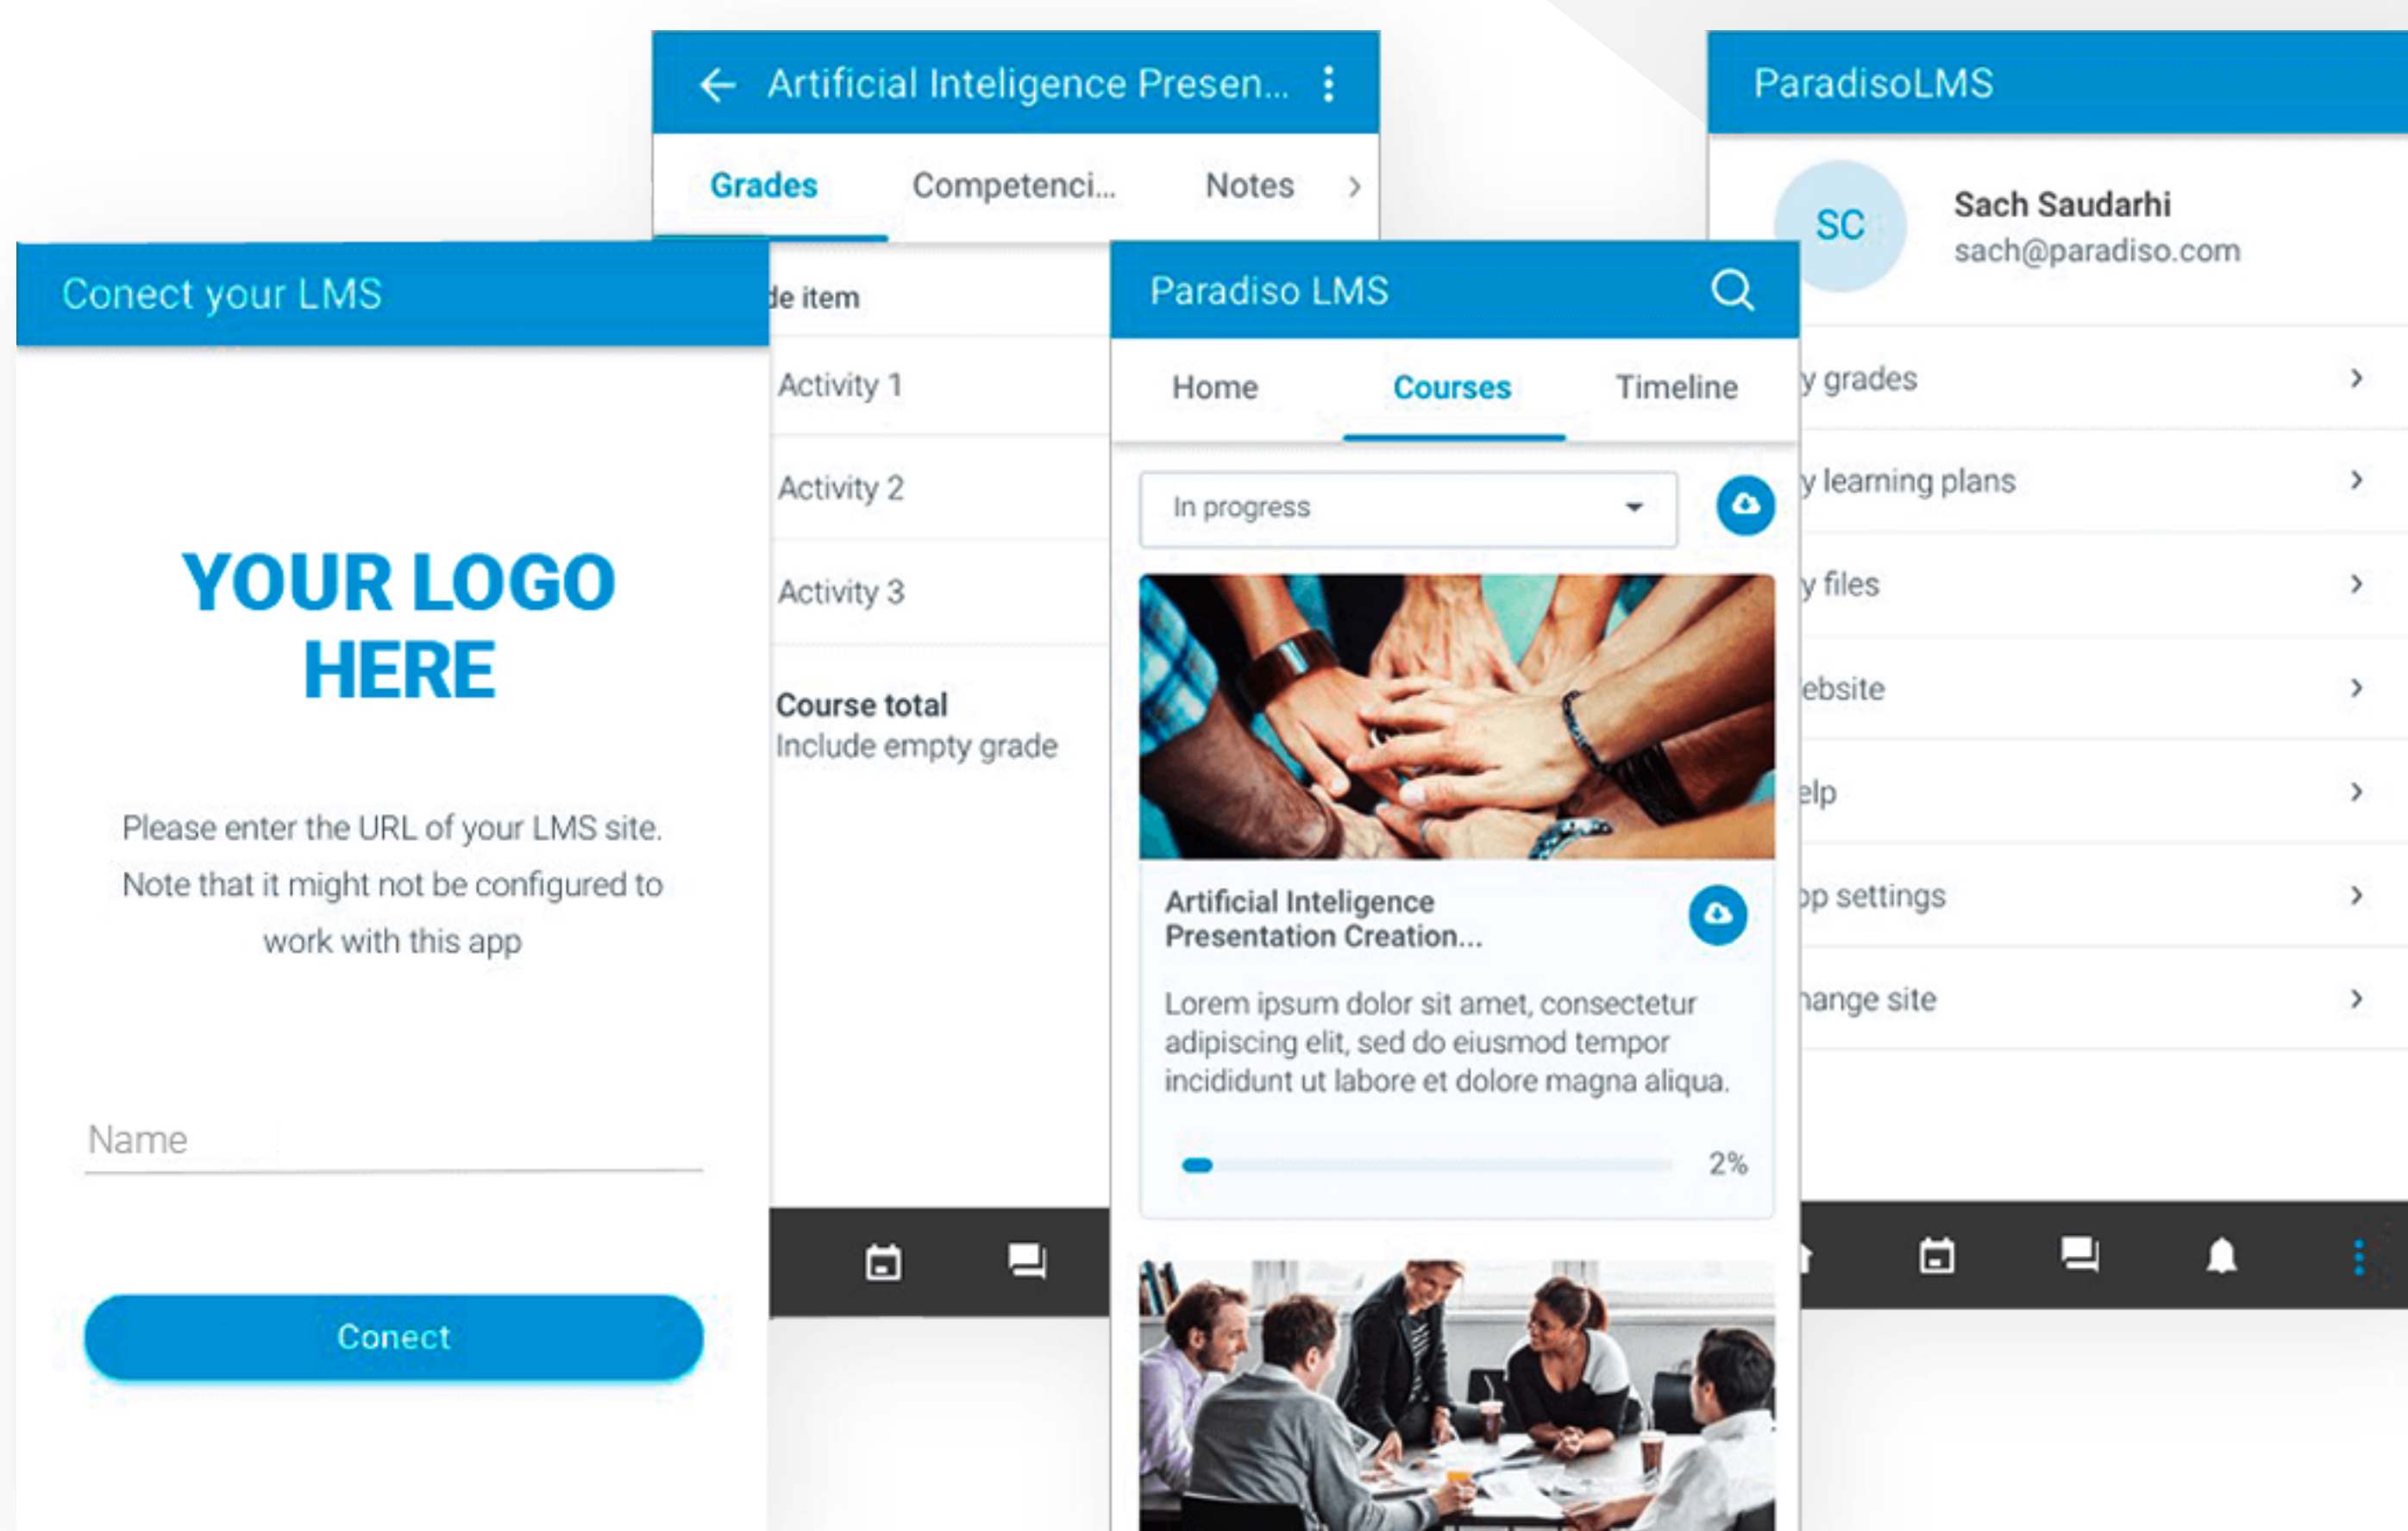

Multitenancy

This is a feature that can be very useful to everyone in the corporate world. This allows companies to have different rooms within just one LMS. It's a choice if one want the rooms to be connected or not.
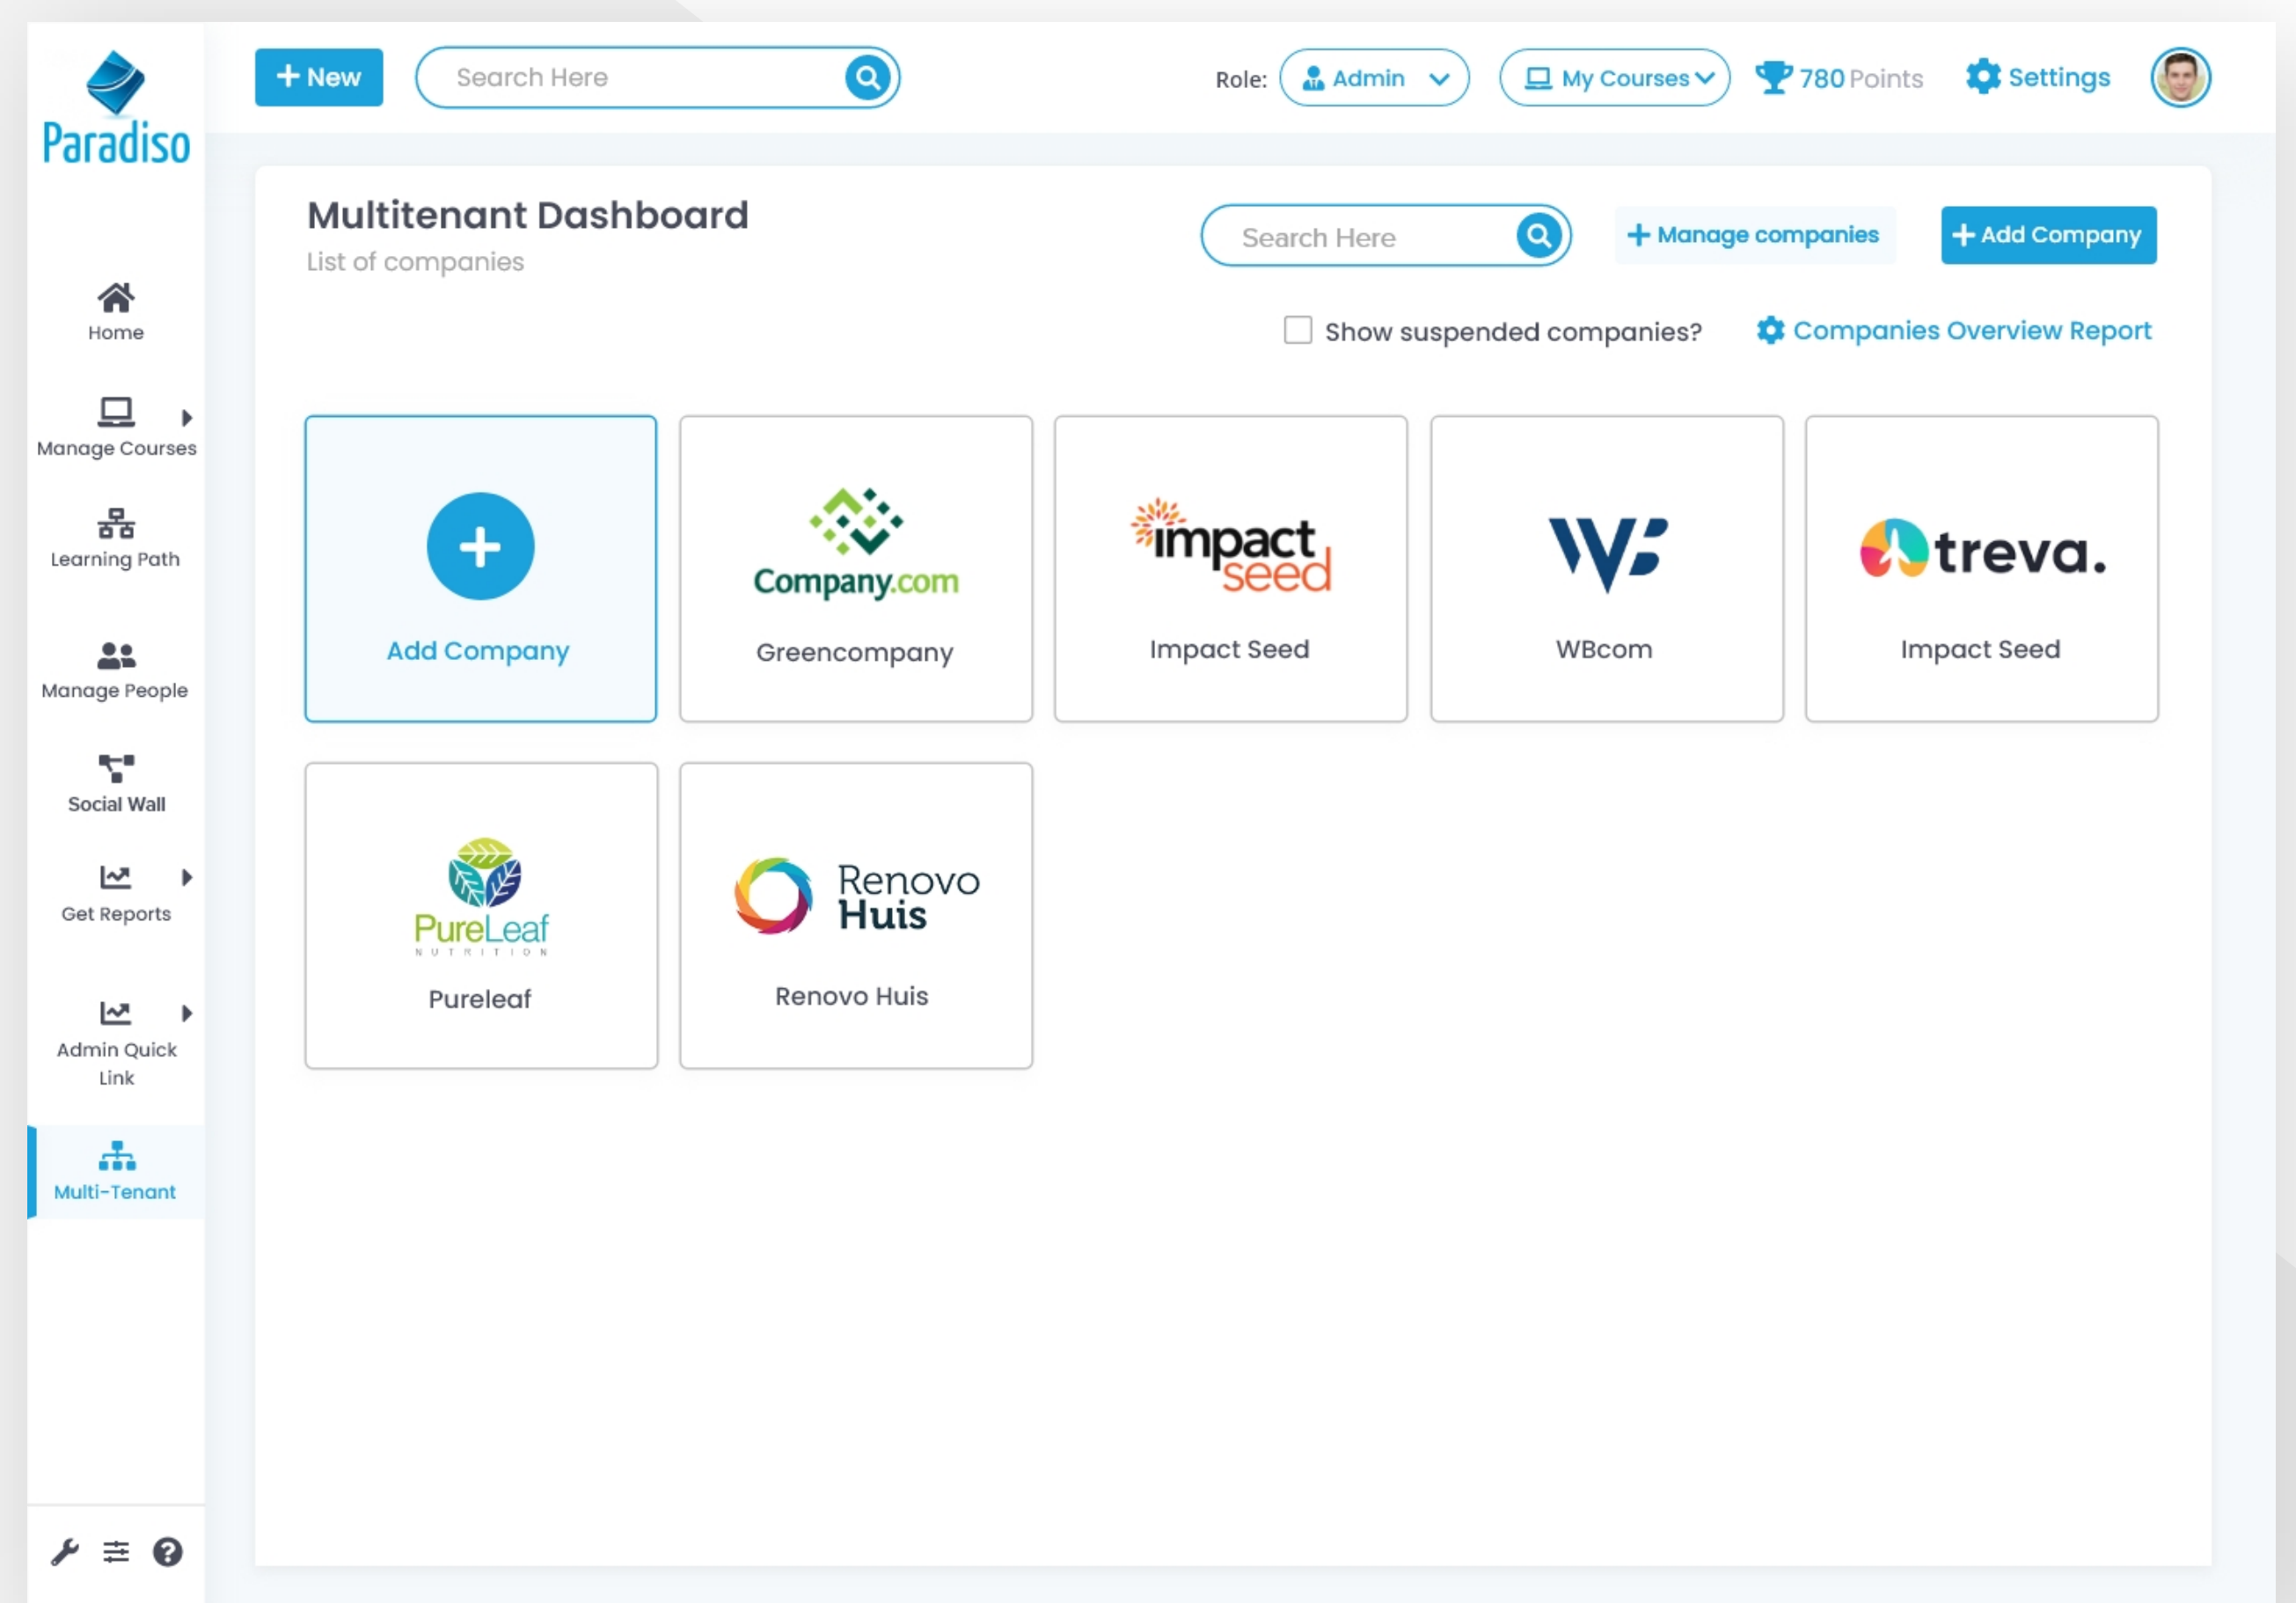

Mobile Learning

Access learning anytime, anywhere and on any device. Full access to all the LMS features on mobile devices, online or offline.
