Visibility and control to manage, optimize, plan and govern

Veeam ONE delivers deep, intelligent monitoring, reporting and automation through interactive tools and intelligent learning, identifying and resolving real customer problems before they begin.

veeAM

Key capabilities

Advanced management, analytics and remediation at your fingertips

Proactive alerting

Proactively mitigate potential threats to your environment before they develop into real problems.

Intelligent automation and diagnostics

Reduce costs and response times while resolving common infrastructure and backup-related issues.

Chargeback and billing

Save time and reduce planning complexities by calculating costs of compute and storage per user/group.

Monitoring and reporting

Stay connected with 24.7, real-time visibility into backup, physical and virtual environments.

Capacity planning and forecasting

Remove the guesswork when forecasting future infrastructure needs and planning storage purchases.

Governance and compliance

Alleviate risk by ensuring your data is secure and never compromised by malicious activity, such as ransomware.
